

NXP Nexperia cellular system solution 5210 family for EDGE

With production-ready EDGE solutions from NXP Semiconductors, you get the easiest, most cost-effective way to deliver certified, best-in-class autonomy and performance. We enable rapid, low-risk development, with everything from EDGE modems to complete cellular system solutions. We integrate all the multimedia features you need, without a coprocessor, for an outstanding user experience at a lower overall cost. That means Bluetooth stereo, USB Hi-Speed, FM radio, and audio quality comparable to reference media players. We provide dedicated local support, so you move to mass production faster than ever, with complete confidence.

What if you could quickly deliver exceptional multimedia in a cost-effective way?

NXP develops vibrant media technologies that help bring your ideas to life. Our innovative solutions enhance images, sharpen sound and simplify information sharing. Find out more about the Nexperia cellular system solution 5210 family for EDGE on our website.
