

Digital Signal Controller with CAN for Industrial Applications

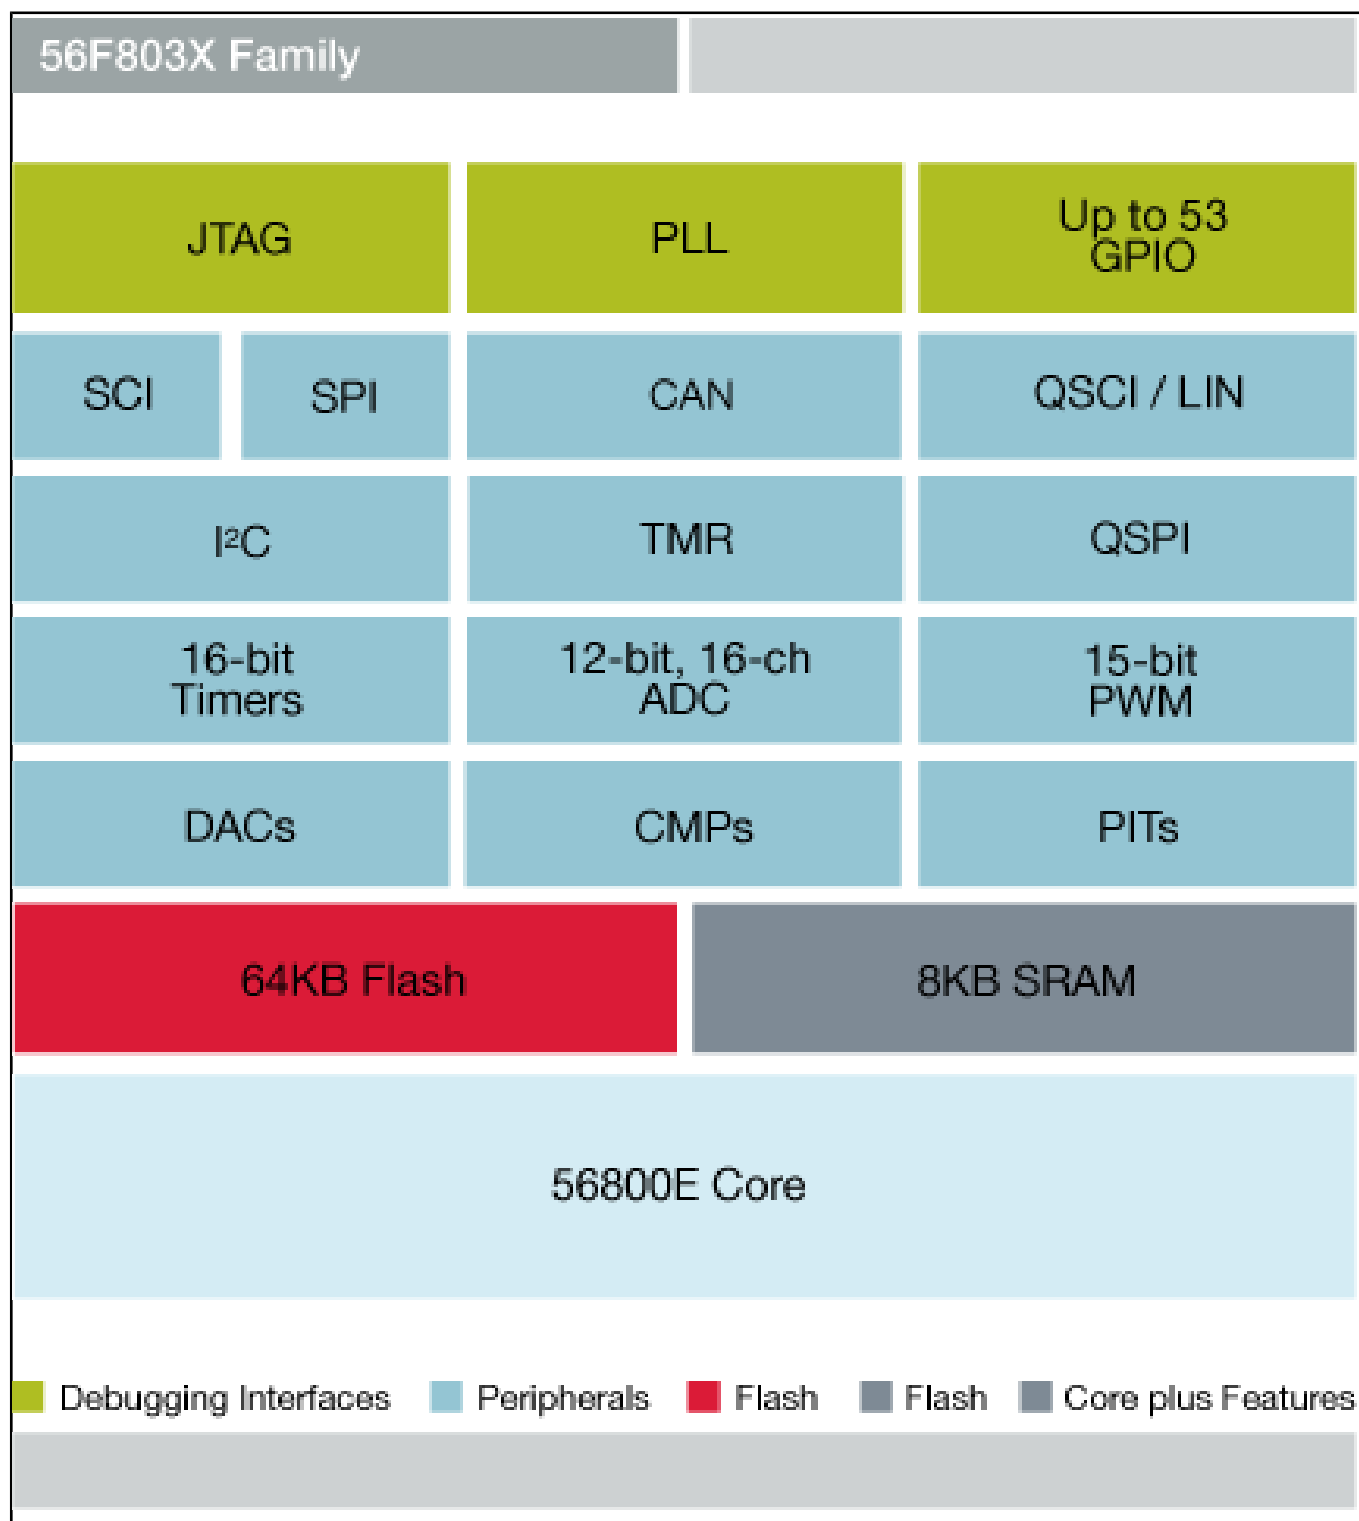

56F803X

Last Updated: Sep 27, 2022

NXP® 56F803X digital signal controllers belong to the 56800E core-based DSC family. It combines digital signal processing and microcontroller functionalities on a single chip, with a flexible set of peripherals.

- Supports industrial and motor control, home appliances, inverters, smart sensors, fire and security systems, switched-mode power supply, power management, and medical monitoring
- On-chip integration and ease of implementation help to speed development, lower component count, and significantly reduce system cost
- Supported by robust development tools to simplify and accelerate time-to-market
