

i.MX 8M Plus – Arm® Cortex® – A53, Machine Learning, Vision, Multimedia and Industrial IoT

IMX8MPLUS

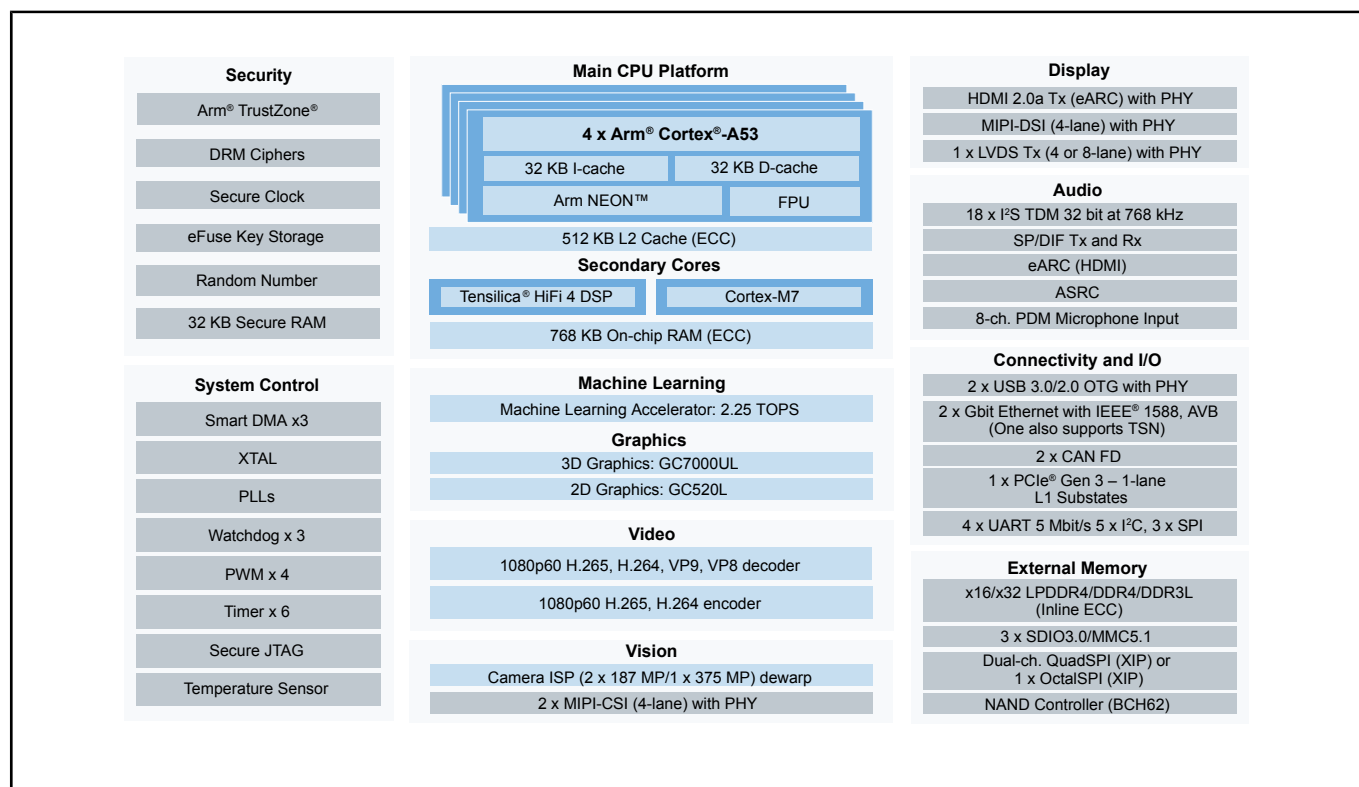

Last Updated: Feb 22, 2024

The i.MX 8M Plus family focuses on machine learning and vision, advanced multimedia, and industrial automation with high reliability. It is built to meet the needs of Smart Home, Building, City and Industry 4.0 applications.

- Powerful quad or dual Arm® Cortex®-A53 processor with a Neural Processing Unit (NPU) operating at up to 2.3 TOPS.
- Dual image signal processors (ISP) and two camera inputs for an effective advanced vision system.
- The multimedia capabilities include video encode (including h.265) and decode, 3D/2D graphic acceleration, and multiple audio and voice functionalities.
- Real-time control with Cortex-M7. Robust control networks supported by dual CAN FD and dual Gigabit Ethernet with Time Sensitive Networking (TSN).
- High industrial reliability with DRAM inline ECC.

i.MX 8 applications processors are part of NXP's EdgeVerse™ [edge computing](#) platform.
