

Integrated ColdFire® V4 Microprocessor

MCF540X

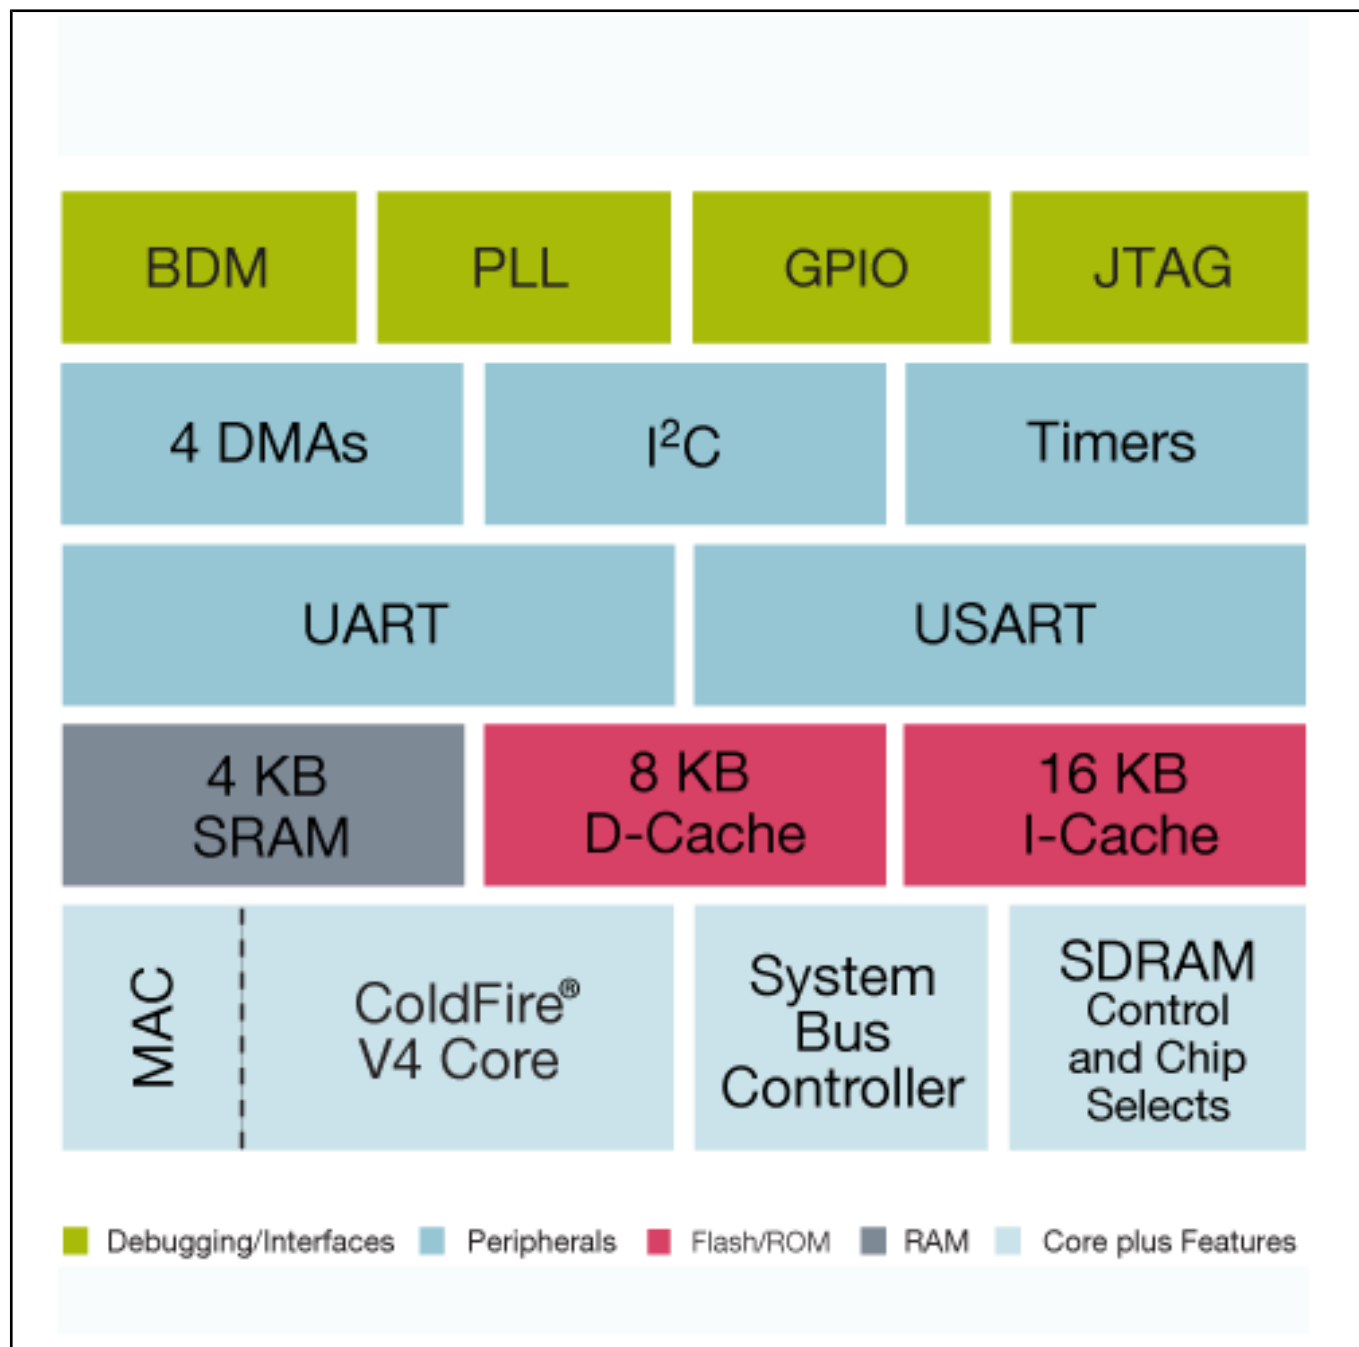

Not Recommended for New Designs

This page contains information on a product that is not recommended for new designs.

Last Updated: Mar 13, 2023

The MCF5407 is the first standard microprocessor to implement the ColdFire® V4 core. Increasing the internal speed of the core allows higher performance and provides system designers with an easy-to-use lower speed system interface.
