

Ultra-Reliable MPC563xM for Automotive and Industrial Engine Management

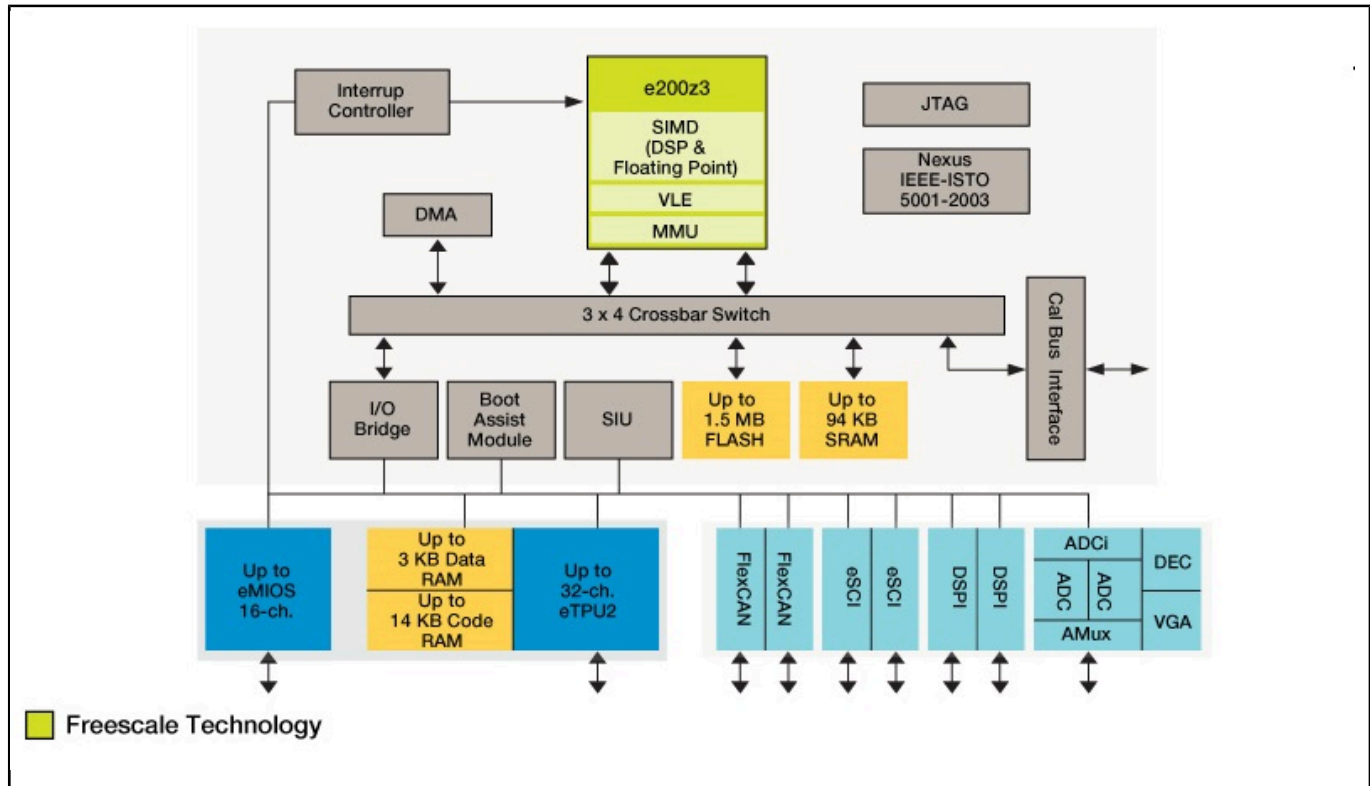

MPC563xM

Last Updated: May 30, 2023

The MPC563xM MCU offers enhanced powertrain functionality for entry-level automotive and industrial applications. It also addresses the aggressive cost constraints of engine and transmission suppliers focused on emerging markets.

- Supports engines up to four cylinders
- Enables strict but affordable emission control and allows a three to five percent improvement of economy and power
- Easy to assemble and inspect (infrared and X-ray technology not required)
- Helps reduce costs through single linear power supply
