

# Electronic Passport(ePP)

Last Updated: Dec 30, 2021

NXP® is a major player in electronic passports (ePassports or biometric passports) solutions and works with the International Civil Aviation Organization (ICAO) to advance security and facilitation of international travel. NXP products are ICAO passport standard 9303 compliant.

The adoption of RFID-based biometric passports has created a more convenient travel experience through less time waiting in line and more efficient identity proofing via automated border control gates. Our secure smart card IC product families feature highly advanced counter-measures against attacks as well as hardware firewalls, ensuring personal data stays safe and secure on the chip.
