

ng Service Pack for CodeWarrior

Tools Quick Start

SYSTEM REQUIREMENTS		
Hardware	Intel® Pentium® 4 processor, 2 GHz or faster, Intel Xeon [™] , Intel Core [™] , AMD Athlon [™] 64, AMD Opteron [™] , or later 2 GB RAM CD-ROM drive for CD installation Microsoft Mouse compliant pointing device Internet connectivity for web downloads and update access	
Operating System	Microsoft® Windows 7 (32/64-bit) Home Premium, Professional, Ultimate Operating System or Windows Server 2012 R2	
Disk Space	2 GB, additional space required during installation	

This Quick Start explains how to install a service pack or an update for your CodeWarrior software running on the Windows platform.

Support for new devices can be added to the CodeWarrior software directly from the Internet (online mode) or from a downloaded archive (offline mode). Both these methods will be explained in this quick start.

NOTE	If your CodeWarrior software is running on Windows 7, start
	the IDE using the Run as Admin option.

service pack for your CodeWarrior tool, you need to perform

tnese steps.

- 1. Select the service pack archive.
- 2. Install the service pack.

Section A: Select the Service Pack Archive

Online Mode

If your computer is connected to Internet, you can install the service pack directly from the software site where the service pack is available.

- 1. Open the CodeWarrior IDE.
- Select Help > Install New Software from the CodeWarrior IDE menu bar.

The Install dialog box appears.

- **NOTE** Do not use the **Check for Updates** option from the **Help** menu. The **Install New Software** option is more comprehensive as it locates new service packs that are considered new software and are not the usual product updates.
- 3. From the **Work with** drop-down list, select the URL where the service pack you wish to install is available.

Install Dialog Box

🥦 Install	
Available Software Select a site or enter the location of a site.	
Work with: bype or select a site All Available Sites type filter te, FSL SC Eclipse Update Site - http://freescale.com/lgfiles/u	Add Sites' preferences. pdates/Eclipse/SC10_6_5/com.freescale.sc.updatesite
Name	Version
۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰	•
Show only the latest versions of available software	Hide items that are already installed
Group items by category	What is already installed?
Show only software applicable to target environment	
Contact all update sites during install to find required software	
(?)	< Back Next > Einish Cancel

NOTE The Work with drop-down list is populated by the Available Software Sites preferences window. Only the sites that are enabled in the preferences window are listed. A quick solution is to enter the URL of the target site in the Work with field. The service packs for CodeWarrior for StarCore 10.x is available at: http://freescale.com/lgfiles/updates/Eclipse/ SC10_9_0/com.freescale.sc.updatesite/

If the required software site is not available in the **Work with** dropdown list, add the web site to the list of the available software sites using the **Available Software Sites** preferences window as explained in <u>Section C: Add Service Pack Software Site to Available Software</u> <u>List</u>.

Offline Mode

If your computer is not connected to the Internet you can install the service pack manually from an archive.

e CodeWarrior IDE.

 Select Help > Install New Software from the CodeWarrior IDE menu bar.

The Install dialog box appears.

3. Click Add.

The Add Repository dialog box appears.

Add Repository Dialog Box

🏸 Add Re	pository		— ×

2. From the **Work with** dropdown menu, select the Freescale software site set up previously.

The list of software available on the Freescale software site appears in the list box below the dropdown menu.

3. Check the Group items by category box.

The list box organizes the available software by category.

NOTE You can also check the **Group items by category** checkbox to classify and identify the nature of the update. It is a good practice to have the features in a service pack specified according to categories. This helps in a scenario where a service pack includes many features. If features are grouped by categories it allows you to install the category as per your

quirements. If this checkbox is unchecked, all the features will be visible and will be automatically installed.

You can also check the **Show only the latest versions of software available** and **Hide items that are already installed** checkboxes. This limits the items displayed and you can focus on selecting items based on your requirements.

- 4. Select the service pack you want to install.
- 5. Click Next.

The Install Details page of the install wizard appears.
