[54] For the most recent model descriptions, source code, and documentation, see the web-site [http://www.semiconductors.philips.com/Philips\\_Models](http://www.semiconductors.philips.com/Philips_Models).

[55] V. Palankovski, R. Schultheis, and S. Selberherr, *Simulation of power heterojunction bipolar transistor on gallium arsenide*, *IEEE Trans. Elec. Dev.*, vol 48, pp.1264-1269, 2001. Note: the paper uses  $\alpha = 1.65$  for Si, but  $\alpha = 1.3$  gives a better fit; also  $\kappa_{300}$  for GaAs is closer to 40 than to the published value of 46 (Palankovski, personal communication).

## **Bibliography for Modelbooks**

Books [1, 2, 3, 4, 5, 6, 7, 8, 9]

Diode [10]

Basic articles [11, 12, 13, 14]

LPNP [15, 16]

Epilayer model [17, 18, 19]

Charge modelling [20, 21, 22, 23]

Current crowding [24, 25, 26, 27]

Avalanche [28]

Mextram articles [29, 30, 31, 32] [33, 34] [35, 36, 37] [38, 39] [40, 41, 42]

LPNP reports [43]

Mextram reports [44, 45, 46, 47] [48, 49, 50] [51, 52, 53]
