

BeeKit Wireless Connectivity Toolkit

BEEKIT_WIRELESS_CONNECTIVITY_TOOLKIT

Last Updated: Jan 10, 2023

BeeKit® is a standalone software application to create, modify, save and update wireless network solutions based on our protocol stacks. BeeKit provides a wizard to easily configure parameters before creating the project. With the comprehensive code base of wireless networking libraries, application templates, and sample applications, the user generates the appropriate workspace files to be imported into an integrated development environment (IDE) for continued development and debugging. BeeKit includes an unlimited use license for the SMAC and 802.15.4 codebases and Our BeeStack®™ ZigBee codebases.
