Battery Management Systems (BMS) for Electrochemical Impedance Spectroscopy (EIS)

BMS-EIS-SW

Last Updated: Jul 22, 2026

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information contact support or your sales representative.

The NXP Battery Management Software (BMS) Electrochemical Impedance Spectroscopy (EIS) Software Enablement Package accelerates development and testing of this solution on customer batteries. It includes an intuitive graphical user interface (GUI) and BMU EIS firmware. Ideal for rapid prototyping and validation, it supports flexible excitation sources tailored to various battery configurations and system requirements.
