

Building Safety

Last Updated: Dec 6, 2023

Smoke detectors are a vital safety feature of any home or building. They incorporate sensors to detect smoke, fire, carbon monoxide, and other noxious fumes.

Detectors are also becoming more intelligent as they seamlessly connect wirelessly with each other as well as to other parts of a building automation system. Working together with a thermostat and home automation or building gateway, these devices can alert individuals and authorities quicker, reducing the alert time and avoiding property damage and casualties.
