Last Updated: Apr 5, 2022

NXP® metering technology enables one-phase, two-phase, and three-phase electricity meters used for measurement and registration of active, reactive, and apparent energy in residential and commercial metering applications. Along with its connectivity solutions for smart metering – like IEEE 802.15.4, ZigBee and Bluetooth Low Energy - NXP addresses the challenges smart cities face for reliable, secure communications for remote metering and home energy management.
