

FRDM Automotive S32K144 Development Board for General Purpose

FRDM-A-S32K144

Preproduction

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information please contact your sales representative.

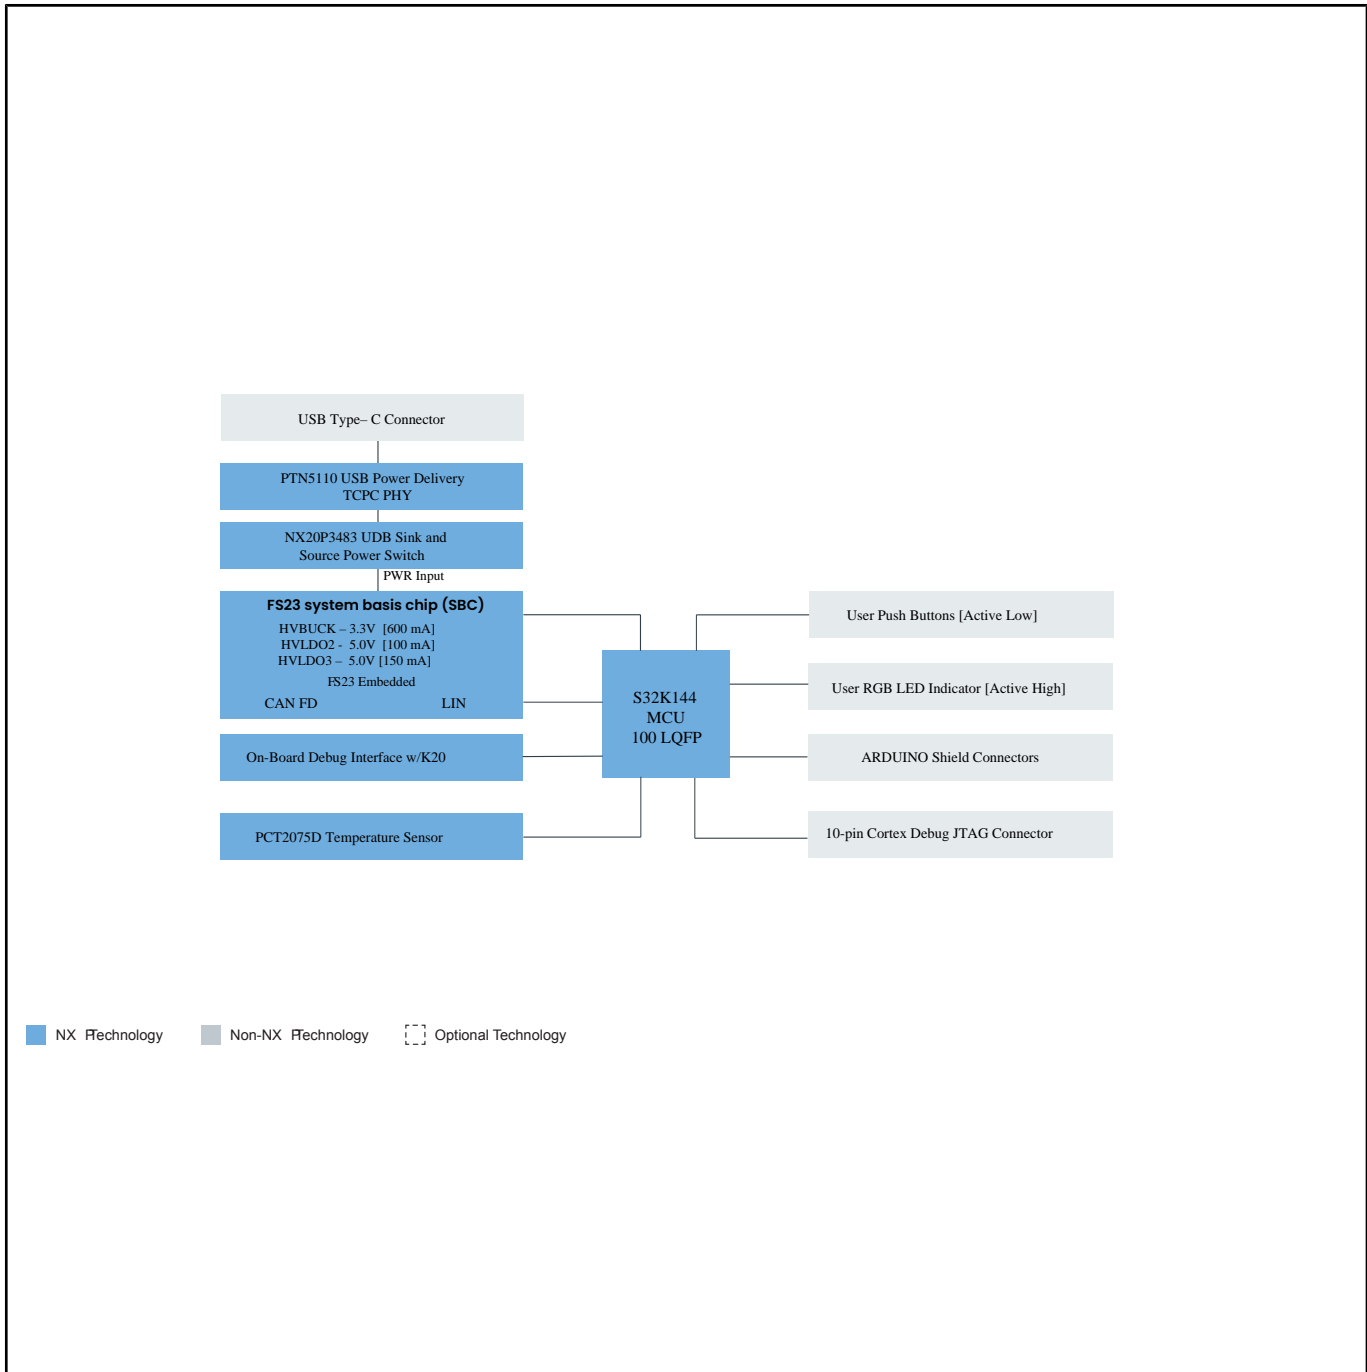

Last Updated: Mar 16, 2026

The FRDM Automotive S32K144 is a development board for general-purpose industrial and automotive applications.

Based on the 32-bit Arm® Cortex®-M4F S32K1 microcontroller unit (MCU), the FRDM Automotive S32K144 offers CAN and LIN through NXP [FS23](#), robust two-way power delivery supply with USB Type-C® and DNP Power JACK connectors, temperature sensor, JTAG and an on-board debugger with NXP [K20](#) MCU.

The FRDM Automotive S32K144 offers a standard-based form factor compatible with the Arduino® UNO pin layout, providing a broad range of expansion board options for quick application prototyping and demonstration.
