FreeMASTER Sensor Tool for IoT/Industrial/Medical Sensors
FREEMASTER-SENSOR-TOOL

Last Updated: May 16, 2025

FreeMASTER Sensor Tool is the sensor evaluation, data-visualization and application development software based on NXP FreeMASTER framework for IoT/Industrial/Medical sensors. It provides out-of-box sensor demonstration GUIs for quick sensor evaluation and development framework for end users to extend/create their custom applications.
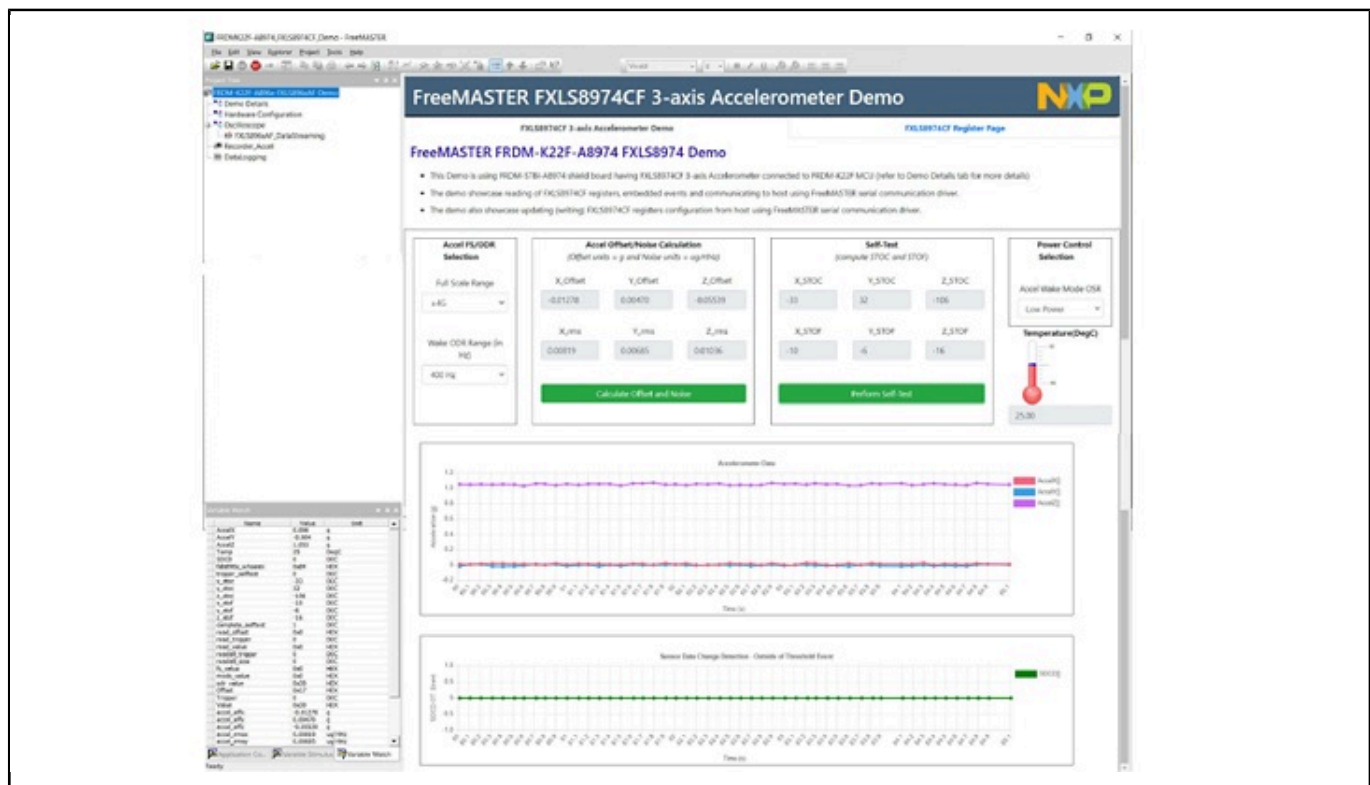

FreeMASTER Sensor Tool enables quick out-of-box sensor demonstration along with flexibility to allow rapid prototyping to create custom GUIs. This software is integrated with the IoT Sensing SDK embedded software framework using FreeMASTER host communication for supported platforms.
