

±2g/±4g/±8g, Low g, 14-Bit Digital Accelerometer

FXLS8471Q

Not Recommended for New Designs

This page contains information on a product that is not recommended for new designs.

Last Updated: Feb 29, 2024

TFXLS8471Q is EOL and not recommended for new designs. NXP recommends that customer consider replacements:

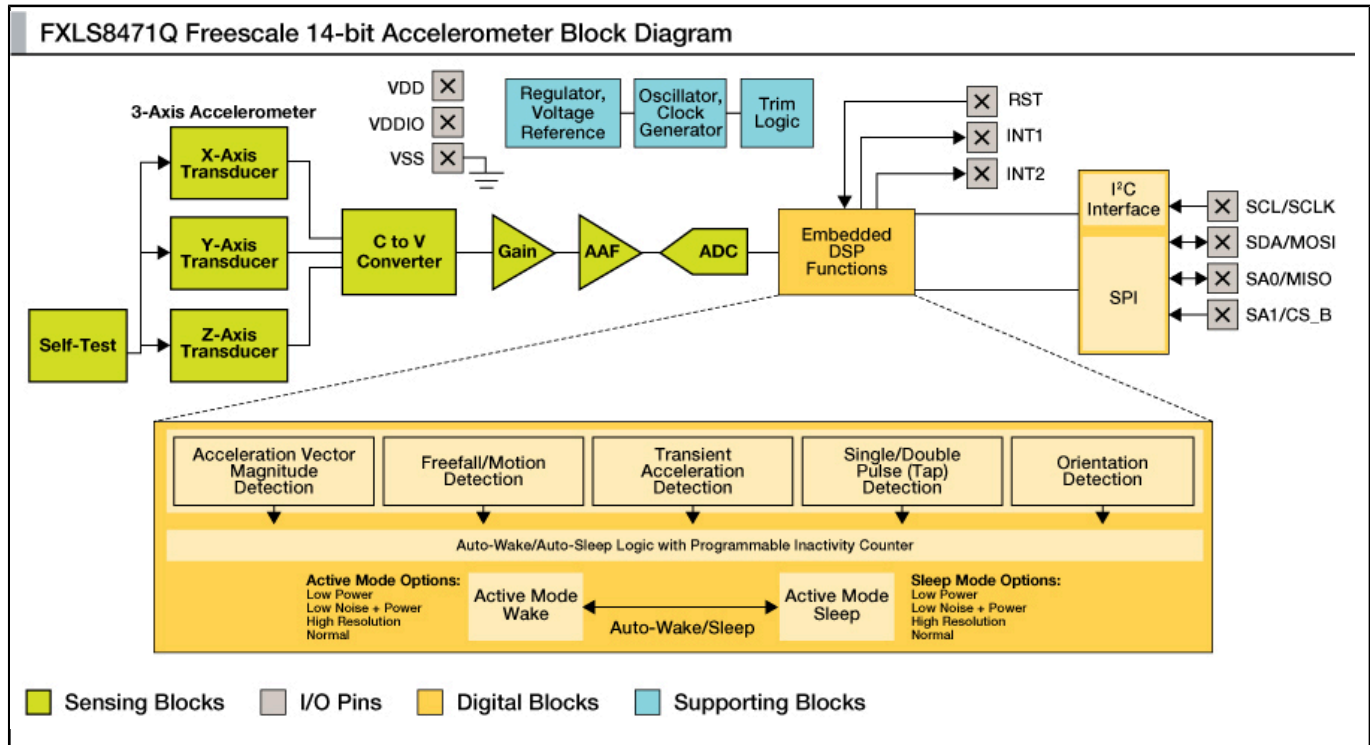

- [FXLS8961AF](#) for automotive applications
- [FXLS8971CF](#) for Industrial/IOT applications

The FXLS8471Q accelerometer is highly versatile and ideal for industrial, consumer and automotive high-performance, low-g applications that offer noise density, board mount offset, temperature performance, and sensitivity.

Featuring:

- FXLS8471Q is AEC-Q100, Grade 2 qualified and guaranteed to operate over the extended temperature range of $-40\text{ }^{\circ}\text{C}$ to $+105\text{ }^{\circ}\text{C}$
- Integrated motion detection including tilt, shake and tap detection with a new vector magnitude output that simplifies implementation and reduces power consumption
- A serial peripheral interface that is pin-compatible with our I2C accelerometer portfolio
