

GreenBox 3 Real-Time Development Platform

GREENBOX-3

Preproduction

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information [contact support](#) or your sales representative.

Last Updated: May 24, 2024

GreenBox 3 is a versatile development platform for S32Z2/E2 high-performance real-time processors which integrates processing, peripherals, networking and connectivity interfaces in a rugged enclosure.

The GreenBox 3 is ideal for development and demonstrations of integrated and isolated real-time applications, such as vehicle dynamics, battery and energy management, motor inverter control and power conversion for central, domain and zonal architectures.
