Active

Last Updated: Aug 3, 2026

The i.MX 91 quick start evaluation kit provides a low-cost platform in a 9x9mm package and includes components that bring out the broad connectivity needed for evaluation of i.MX 91 applications processors. This single-board solution consists of the i.MX 91 system on chip (SoC) (9x9mm package), low-power double data rate 4 (LPDDR4), embedded MultiMediaCard (eMMC), quad serial peripheral interface (QSPI) Nand flash and power management integrated circuit (PMIC). This kit serves as an excellent starting point by providing a low-cost reference board design to accelerate your time to market.
