Industrial Communication Creator

INDUSTRIAL-COMMUNICATION-CREATOR

Last Updated: Apr 20, 2026

Industrial Communication Creator (ICC) enables the configuration of industrial Ethernet stacks, device models and communication parameters in a unified environment. ICC simplifies the configuration of protocols such as PROFINET®, EtherNet/IP™, EtherCAT® and others, including device models, connection and object dictionaries. Using a unified configuration environment with protocol-specific plug-ins, developers can rapidly create industrial communication solutions based on NXP protocol stacks while working within a single tool.
