

Kinetis® K50–100 MHz, USB Microcontrollers (MCUs) based on Arm® Cortex®–M4 Core

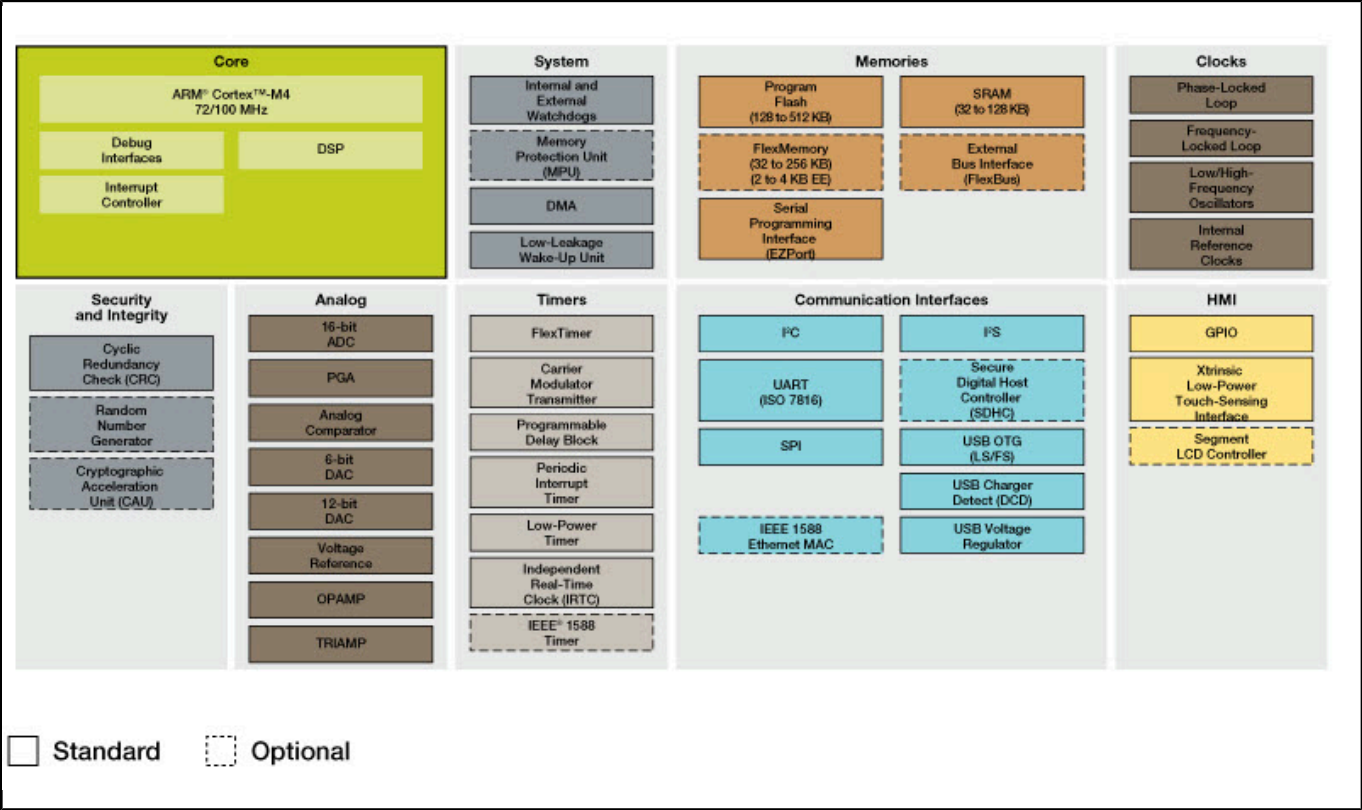

K50_100

Last Updated: Dec 16, 2024

The Kinetis® K50 100 MHz MCU family provides an analog measurement engine consisting of integrated operational and trans-impedance amplifiers as well as high-resolution ADC and DAC modules for medical and industrial applications.

- Increases performance by reducing core interruption
- Supports system cost reduction and design flexibility
- Increases system safety by securing access to critical memory locations
- Offers scalability for key digital power and motor control applications
- Shares the comprehensive enablement of the Kinetis portfolio
