

Kinetis® K82-150 MHz HW Cryptographic Co-Processor and QuadSPI Microcontrollers (MCUs) Based on Arm® Cortex®-M4 Core

K82_150

Last Updated: Jul 31, 2023

The Kinetis® K82 MCU sub-family builds upon the Kinetis MCU portfolio with advanced security capabilities including boot ROM to support encrypted firmware updates. The Kinetis K82 MCU contains automatic decryption from external serial NOR flash memory, hardware AES acceleration with sideband attack protection, and hardware support for public key cryptography. These advancements are done while maintaining a high level of compatibility with the rest of the Kinetis MCU portfolio.
