

FS2530 Safety SBC Evaluation Board

KITFS2530EVM NEW

Last Updated: Jul 30, 2026

KITFS2530EVM is an evaluation board for the FS253x power management-integrated circuit (PMIC), enabling device configuration, evaluation and OTP register programming. The KITFS2530EVM integrates all required hardware to evaluate FS253x devices and includes a communication bridge based on the FRDM-MCXA153 development platform for connection to the FS25 GUI software. The KITFS2530EVM supports functional evaluation of FS253x configurations before final One-Time Programmable (OTP) programming, making it suitable for development, validation and preproduction testing.
