PF09 Development Socket Board

KITPF09FRDMPGM

Last Updated: Nov 6, 2026

The KITPF09FRDMPGM is a customer programing board featuring the PF09, a Nine-channel power management IC with advanced system safety monitoring. The kits integrate all hardware needed to configure completely the featured power management integrated circuit. It integrates a communication bridge based on the FRDM-KL25Z development board to interface with the GUI software interface to fully configure and control the PF09 PMIC. This board is only intended for configuring the device.
