

# Layerscape® 1021A Dual-Core Processor with LCD Controller

## LS1021A

Last Updated: Aug 29, 2023

The LS1 family, which includes the LS1021A communications processor, is built on Layerscape architecture, the industry's first software-aware, core-agnostic networking architecture to offer unprecedented efficiency and scale.

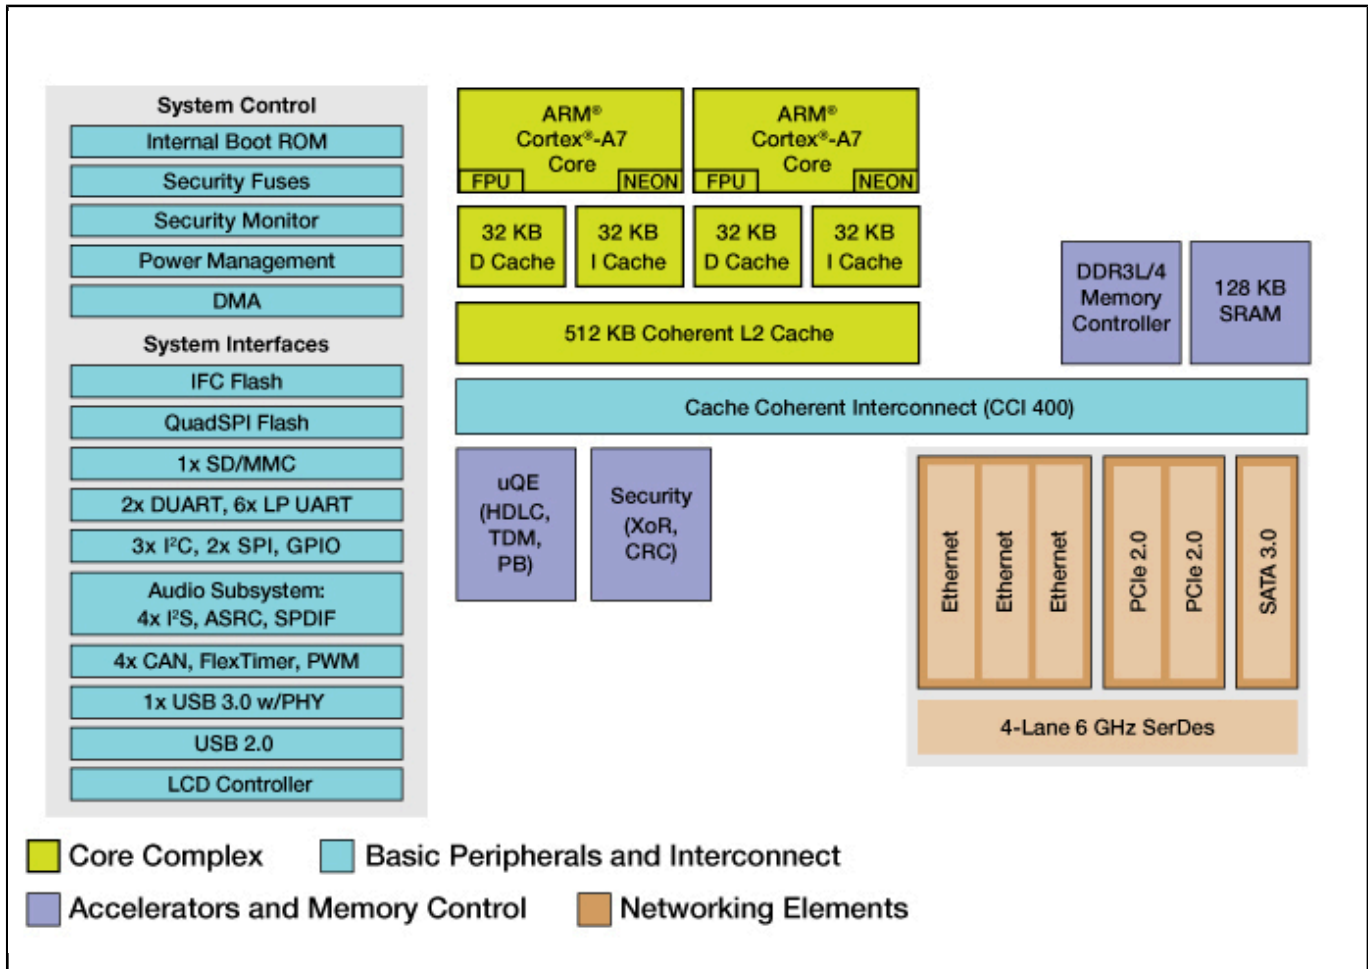

A member of the value-performance tier, the LS1021A processor provides extensive integration and power efficiency for fanless, small form factor enterprise networking applications.

Incorporating dual Arm® Cortex®-A7 cores running up to 1.2 GHz, the LS1021A processor is engineered to deliver CoreMark® performance of over 7,000, as well as virtualization support, advanced security features and the broadest array of high-speed interconnects and optimized peripheral features ever offered in a sub-3 W processor.

The LS1021A processor features an integrated LCD controller, CAN controller for implementing industrial protocols, DDR3L/4 running up to 1600 MHz, integrated security engine and QUICC Engine® and ECC protection on both L1 and L2 caches. The LS1021A processor is pin- and software-compatible with the LS1020A and LS1022A processors.

Layerscape processors are part of NXP's EdgeVerse™ [edge computing](#) platform.
