

External Automotive Lighting Multi-Channel eXtreme Switch

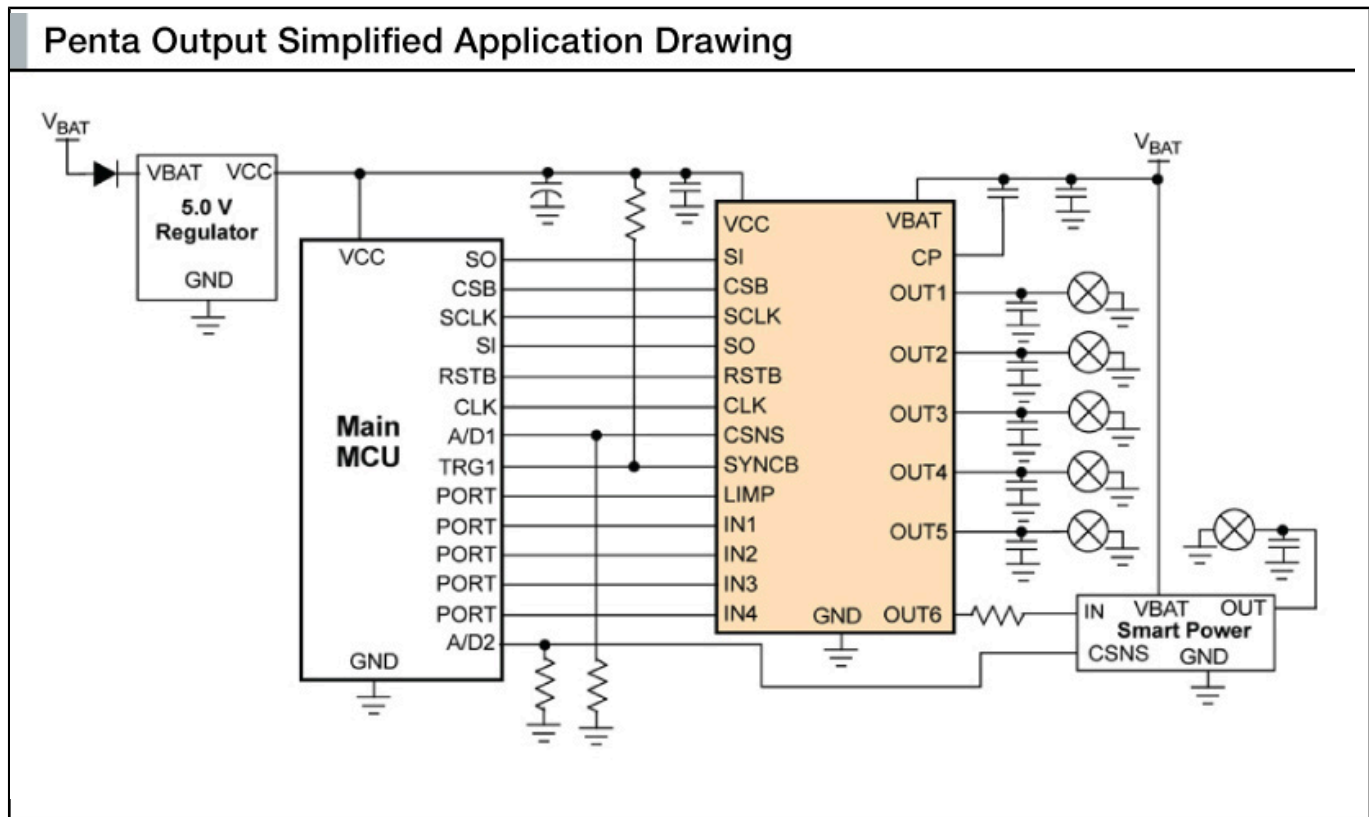

MC12XS6

Last Updated: Jul 15, 2024

The NXP® 12XS6 is a 4th generation eXtreme switch for automotive lighting drivers that can control and diagnose bulbs and light emitting diodes (LEDs) with enhanced diagnostic precision.

- Combines flexibility through daisy chainable SPI at 5.0 MHz, extended digital and analog feedbacks, safety and robustness
- Low RDS(ON) and high integration allows power and space saving at the module level
- Dual, triple, quad, and penta-output devices are hardware and SPI compatible
- Packaged in a Pb-Free power-enhanced SOIC package with exposed pad, which is ELV compliant
