

General Purpose BMS Communication TPL Transceiver and CAN FD Gateway

MC33665A

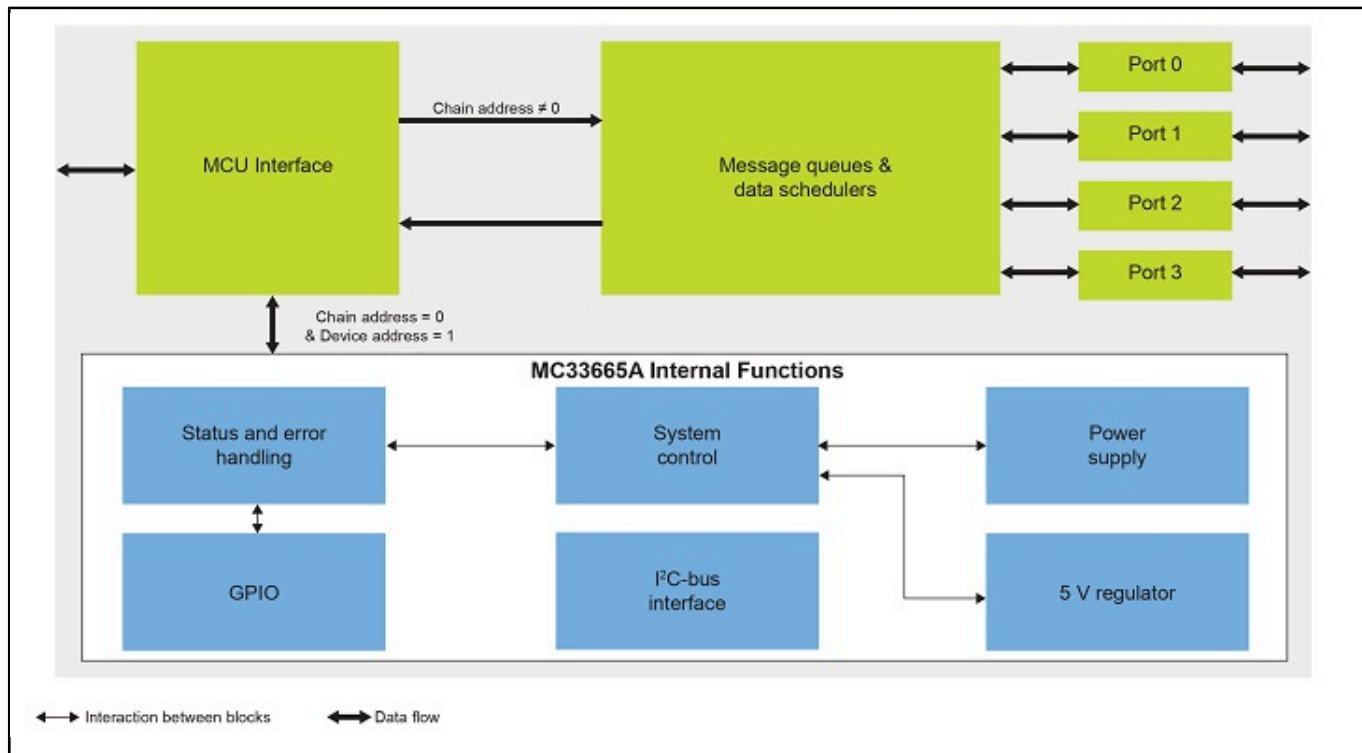

Last Updated: Aug 5, 2022

The MC33665A is a general-purpose battery management communication gateway and TPL transceiver.

The device routes messages upcoming from different TPL (NXPs proprietary isolated daisy chain protocol) ports to standard communication protocols. The standard communication protocols ensures compatibility with most microcontrollers available in the market. The various protocols supported by MC33665A are SPI, CAN FD and UART.
