

Ultra-Reliable MPC564xB-C MCU for Automotive and Industrial Control Applications

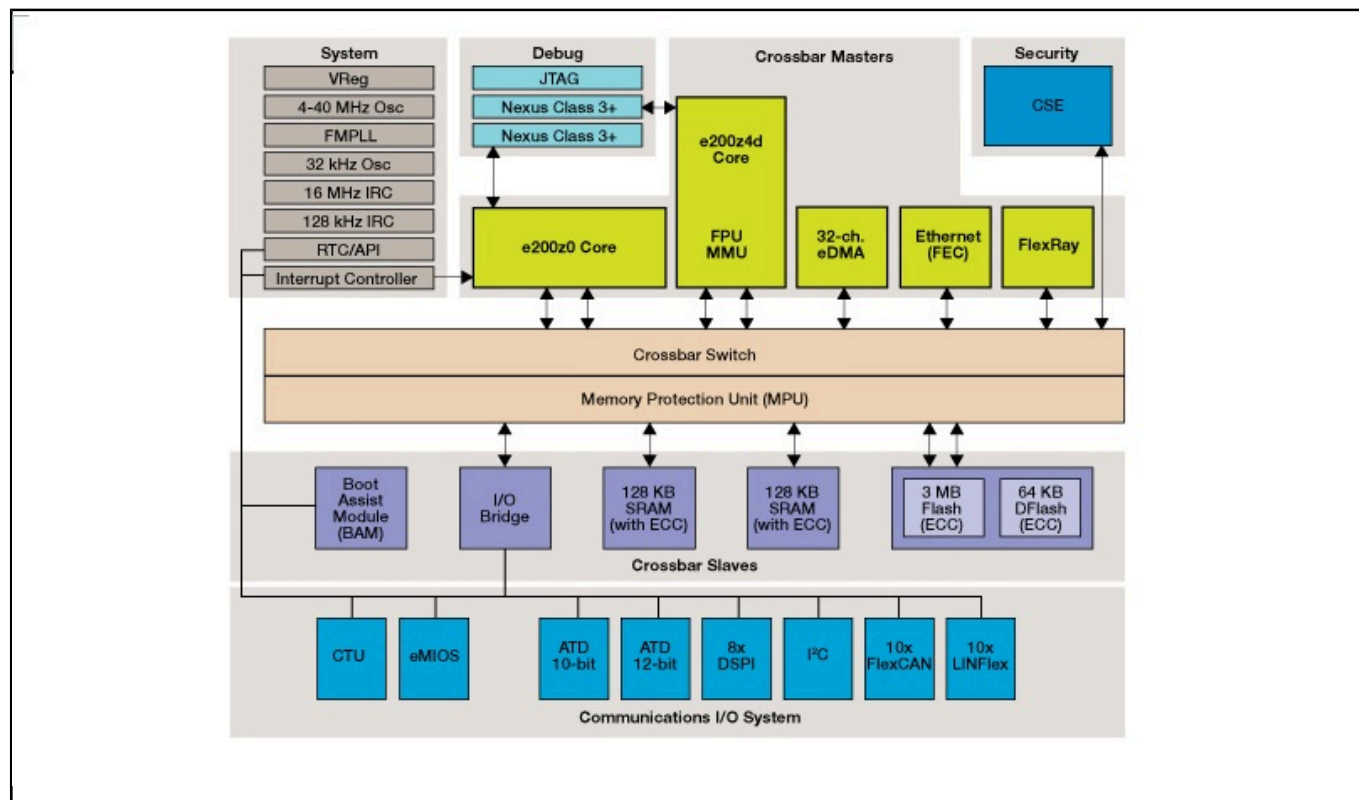

MPC564xB-C

Last Updated: Dec 24, 2025

The MPC564xB-C family of MCUs offers a superior level of integration to address the growing need for enhanced feature sets and increased memory space in high-end automotive body control module (BCM), gateway and industrial applications.

- Reduces power consumption through low-power standby/wait modes
- Provides secure and trusted transmission of information between parties
- Supports quick design implementation through an enablement ecosystem that includes software drivers, operating systems, and configuration code
