

Ultra-Reliable MPC56xS MCU for Automotive and Industrial Instrument Clusters

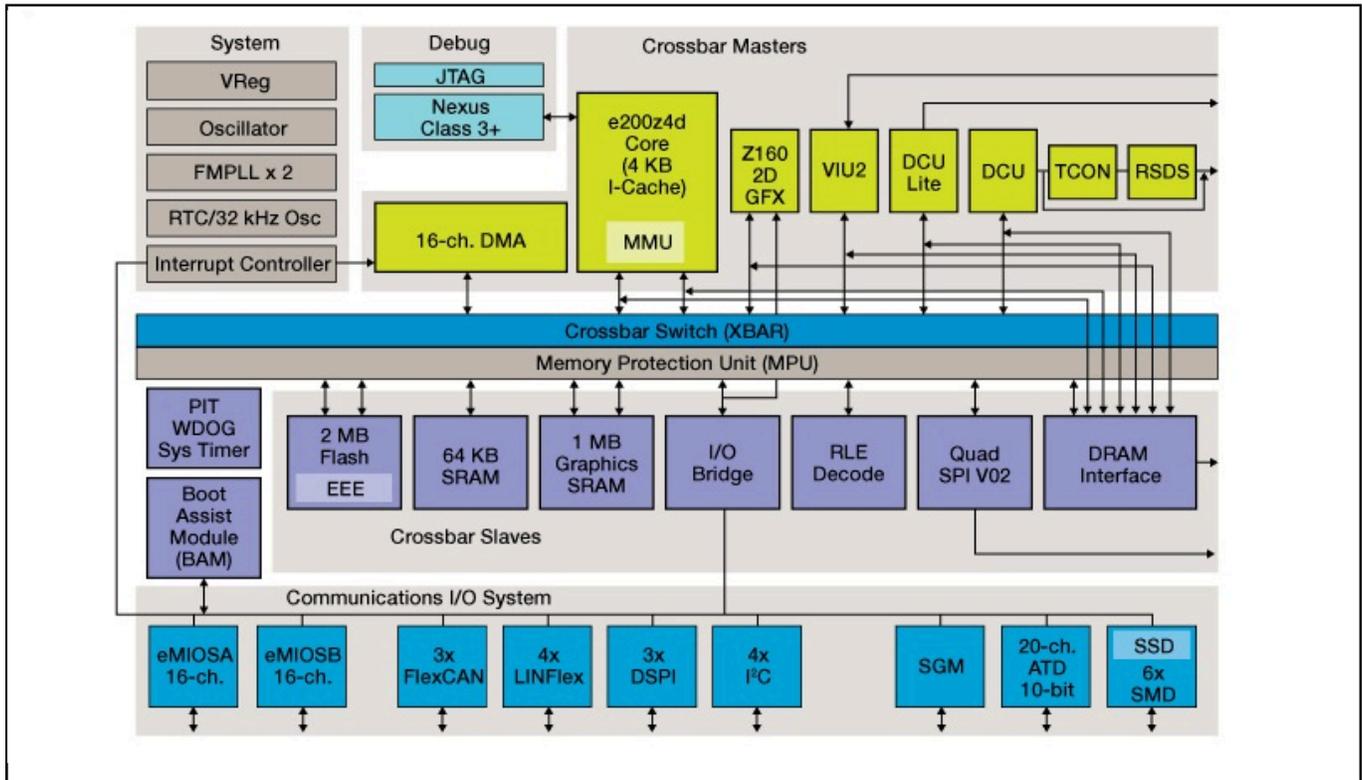

MPC564xS

Last Updated: Apr 27, 2023

The NXP® MPC564xS family of MCUs targets the needs of automotive instrument cluster and industrial markets.

- Includes on-chip display control units that directly drives the TFT displays
- Low-power design enables dynamic power management of core and peripherals
- Offers an industry standard graphics accelerator to help drive sophisticated graphics (e.g., simulated instrument cluster needles or image warping for heads-up displays)
- Offers code compatibility with applications in the MPC560xS environment
- Supported by robust enablement ecosystem to simplify and accelerate development
