

MPC5775B and MPC5775E Microcontrollers for Battery Management Systems (BMS) and Inverter Applications

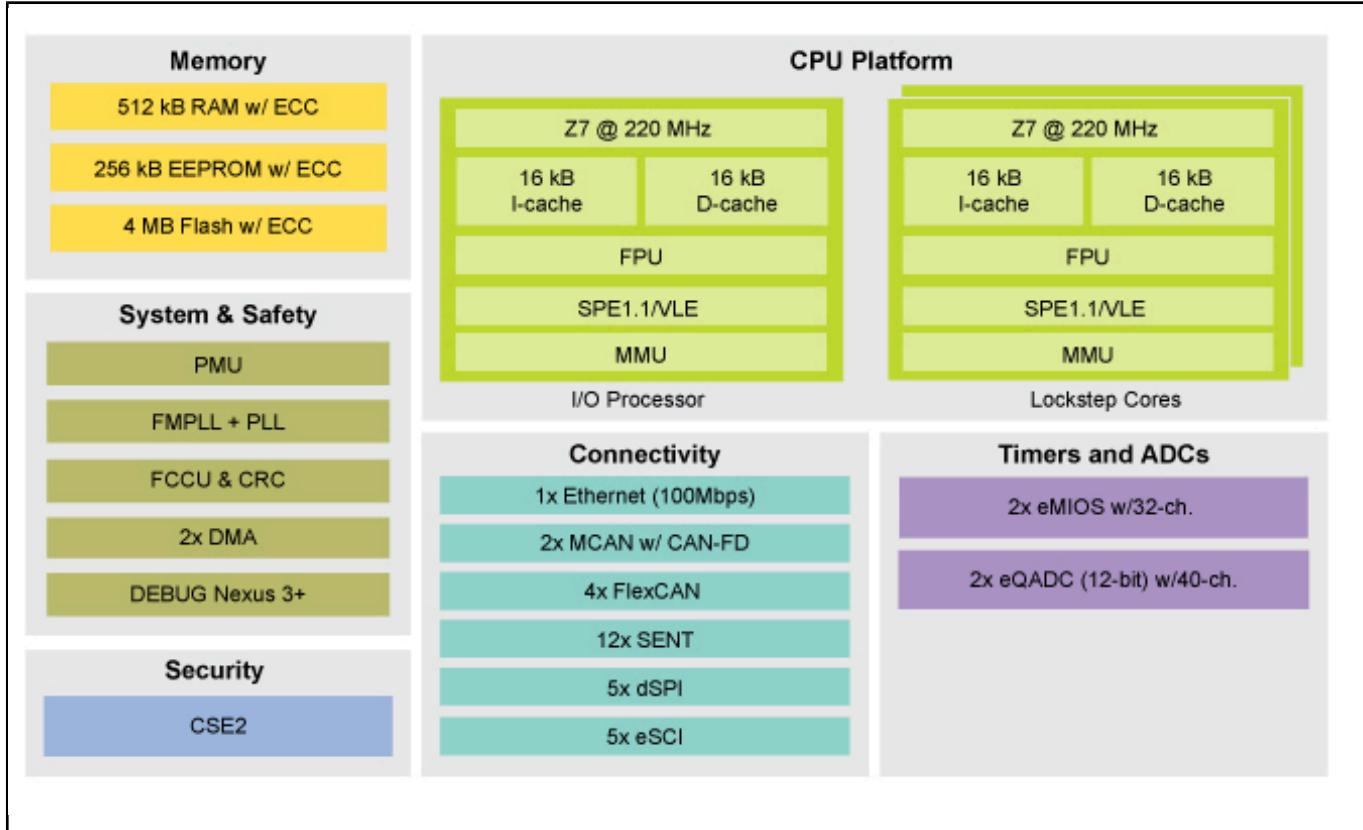

MPC5775B-E

Last Updated: Dec 15, 2024

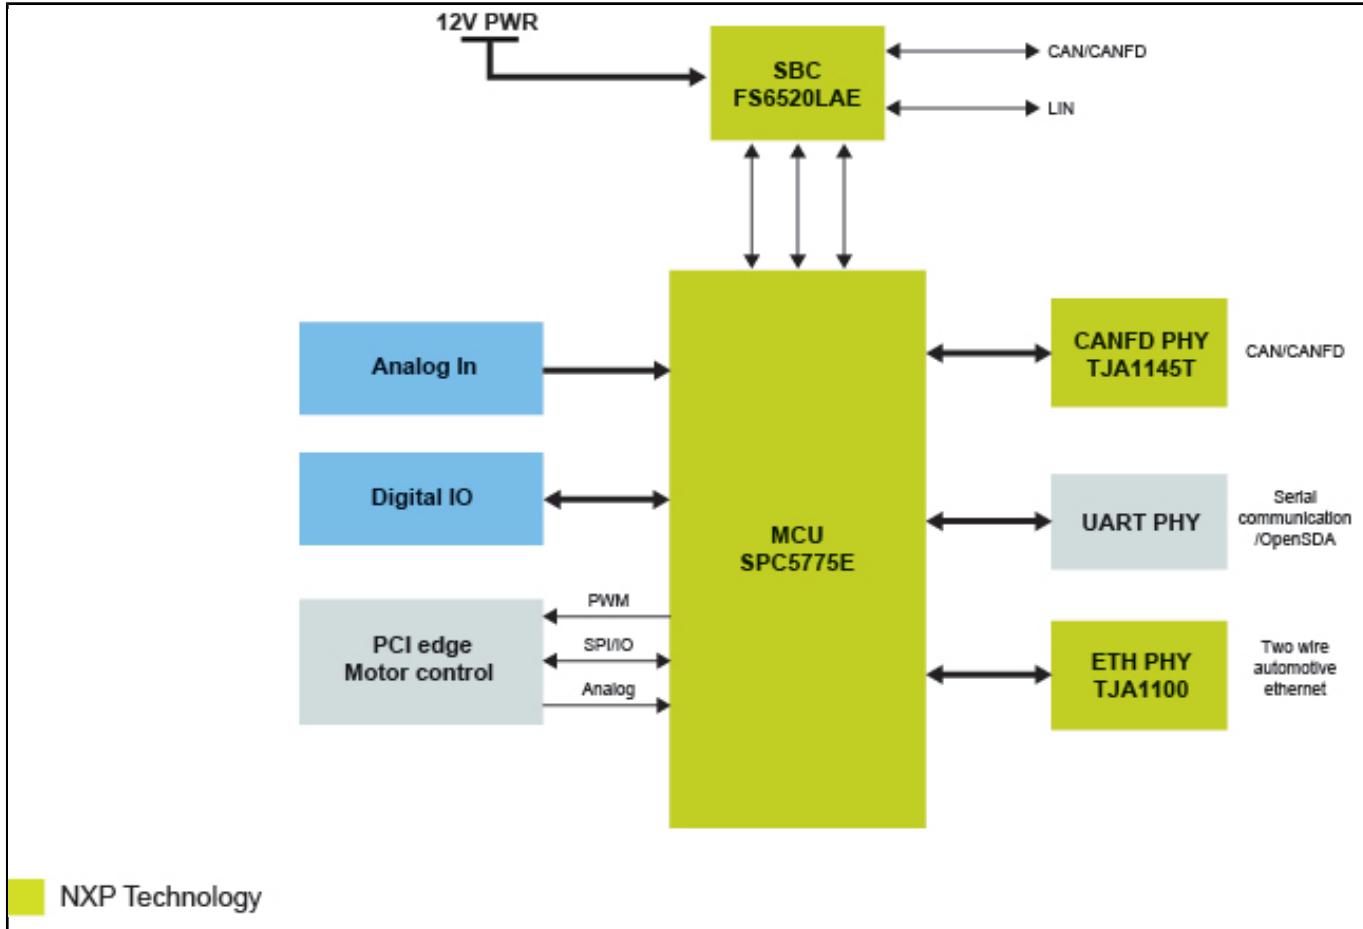

The MPC5775B and MPC5775E microcontrollers target automotive and industrial battery management and inverter applications that require advanced performance, security, and ASIL D support.

These MCUs are compatible with the MPC5777C device and offer customers an optimized feature set for the targeted applications. The MPC5775B and MPC5775E provide an ideal migration path for customers using MPC5xx, MPC55xx, MPC5644A and MPC5674F with eTPU timer and similar pin count options.
