

Ultra-Reliable MPC5777C MCU for Automotive and Industrial Engine Management

MPC5777C

Last Updated: Dec 15, 2024

The MPC5777C Power Architecture® MCU targets industrial and automotive engine control applications that require advanced performance, timing systems, security, and functional safety capabilities. The family offers a high-performance multicore architecture with industry standard eTPU based timer system. A Flash offering that supports code expansion, a security module, and packaging options are available along with the highest level of functional safety (ASIL D) support.
