

MPC5604P 3-phase BLDC Development Kit

MTRCKTSBN5604P

Last Updated: Jul 21, 2022

The MTRCKTSBN5604P motor control development kit is ideal for sensorless applications requiring one BLDC motor, such as HVAC or electric pumps. Designed to enable rapid prototyping and evaluation of a motor control application without having to wait for the final hardware design, the kit includes a 32-bit NXP® [MPC5604P](#) based controller board and the 3-phase low-voltage power stage board.

The application software provides a complete reference implementation of the BLDC motor control application and also takes advantage of the Automotive Math and Motor Control Library Set.
