

MPC5606B 3-phase BLDC Development Kit

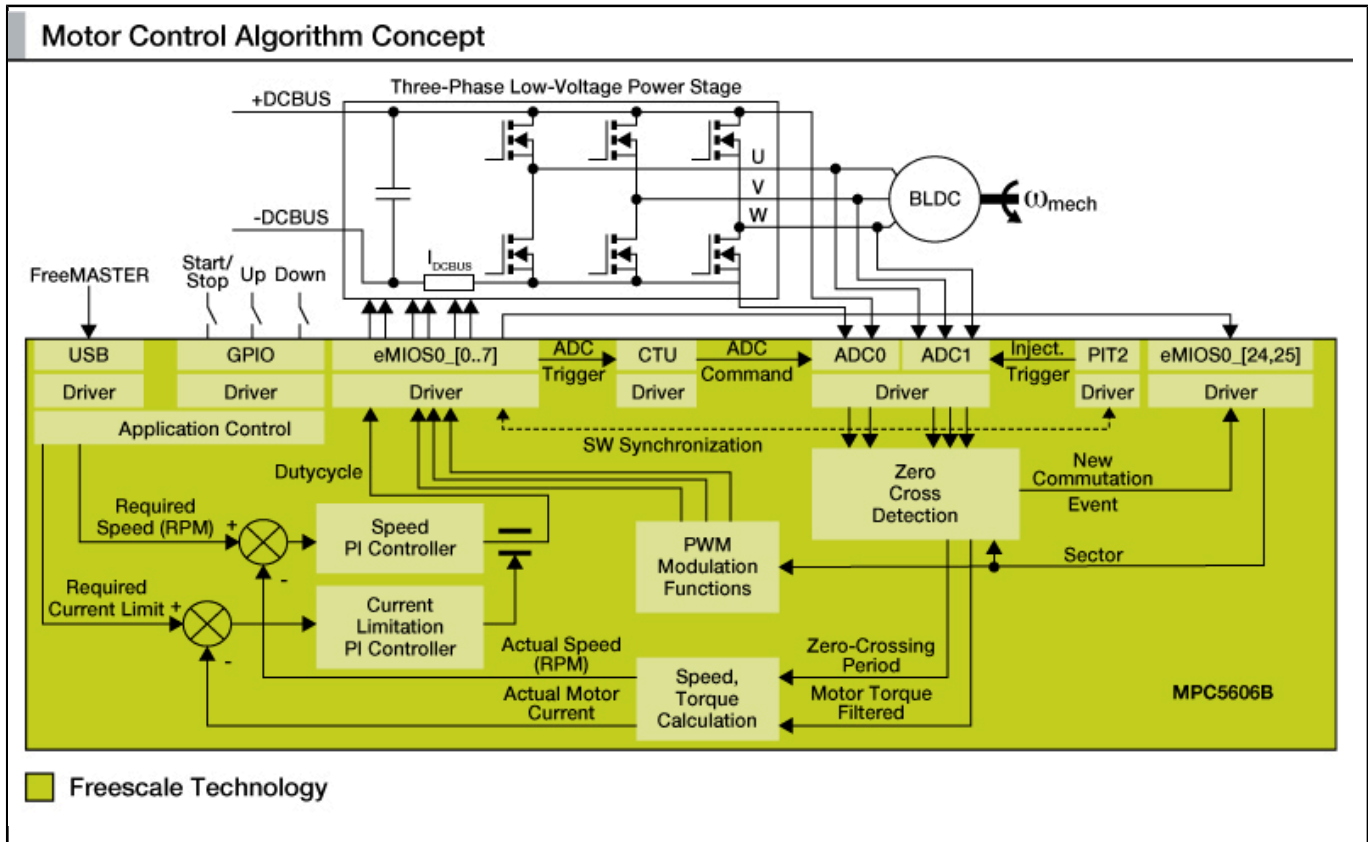

MTRCKTSBN5606B

Last Updated: Jun 1, 2022

The MTRCKTSBN5606B motor control development kit is ideal for sensorless applications requiring one BLDC motor, like HVAC or electric pumps.

- Designed to enable rapid prototyping and evaluation of motor control applications without the need to wait for the final hardware design
- Includes a 32-bit NXP® MPC5606B based controller board and the 3-phase, low-voltage power stage board
- The application software provides a complete reference implementation of the BLDC motor control application and takes advantage of the Automotive Math and Motor Control Library Set
