

MPC5604P 3-phase PMSM Development Kit

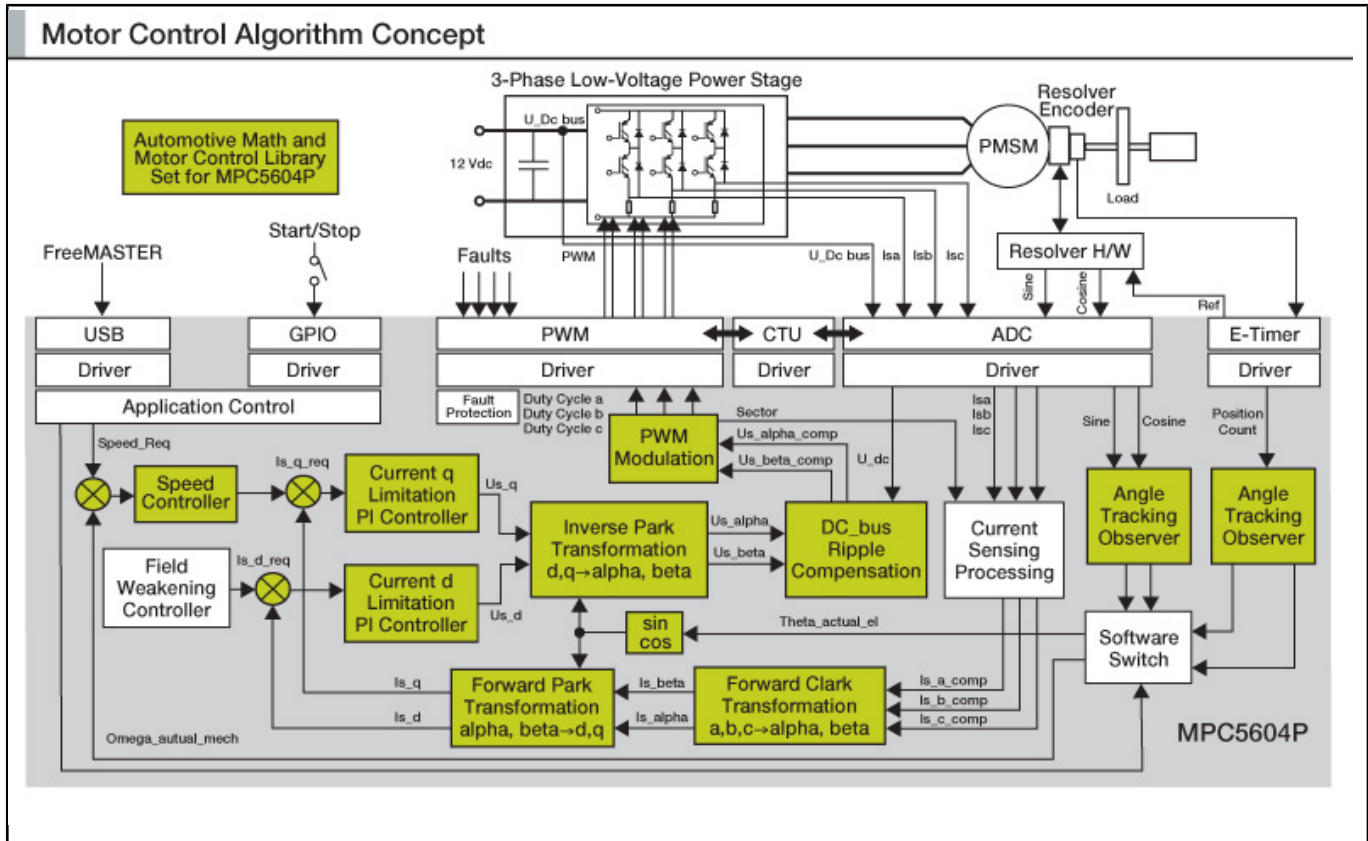

MTRCKTSPS5604P

Last Updated: Jul 18, 2022

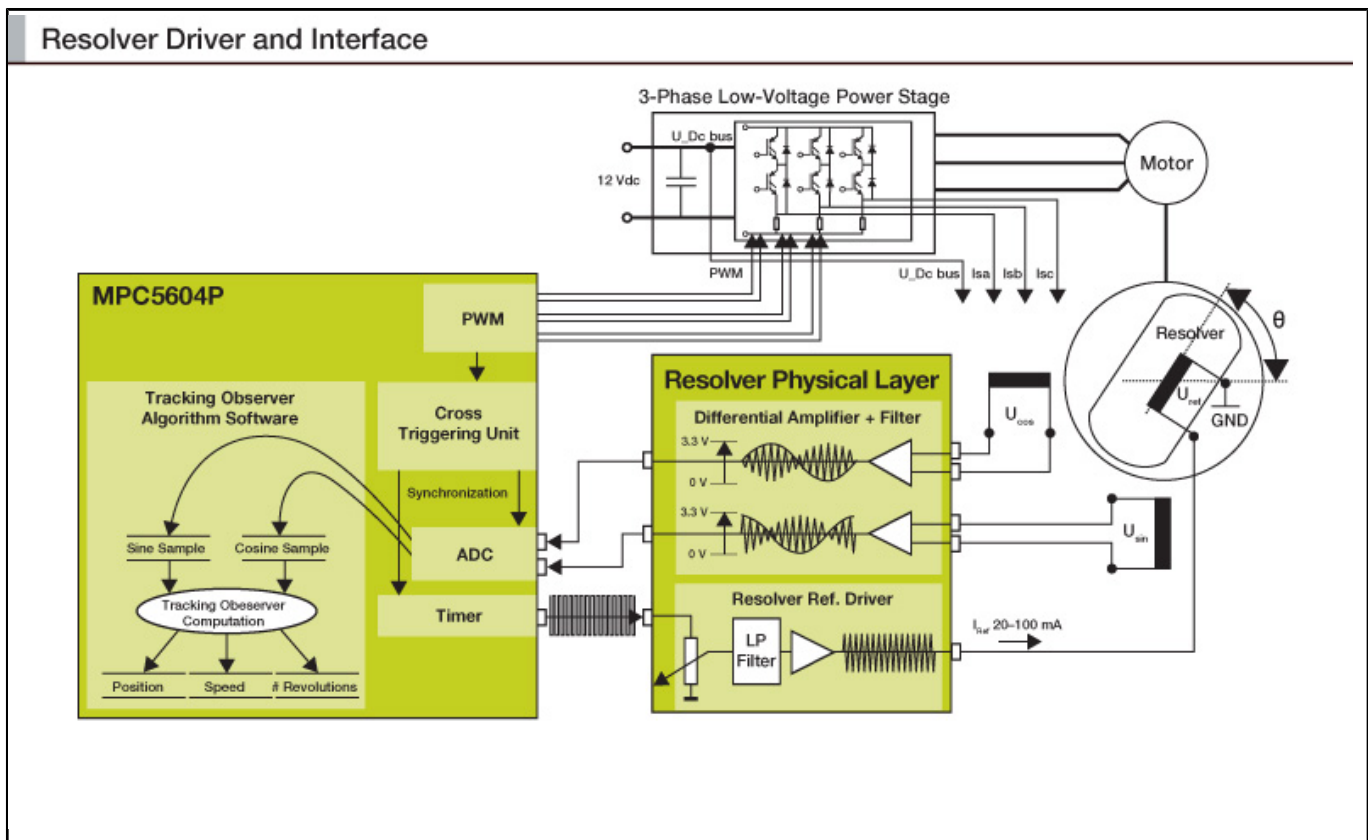

The NXP® MTRCKTSPS5604P motor control development kit is ideal for applications requiring one PMSM motor, such as active suspension or electric powertrain.

- Designed to enable rapid prototyping and evaluation of the motor control application without having to wait for the final hardware design
- Includes a 32-bit NXP MPC5604P based controller board and the 3-phase low-voltage power stage board
- The application software provides a complete reference implementation of the PMSM motor control application and also takes advantage of the Automotive Math and Motor Control Library Set
