

## 15 Watt Wireless Charging Receiver ICs

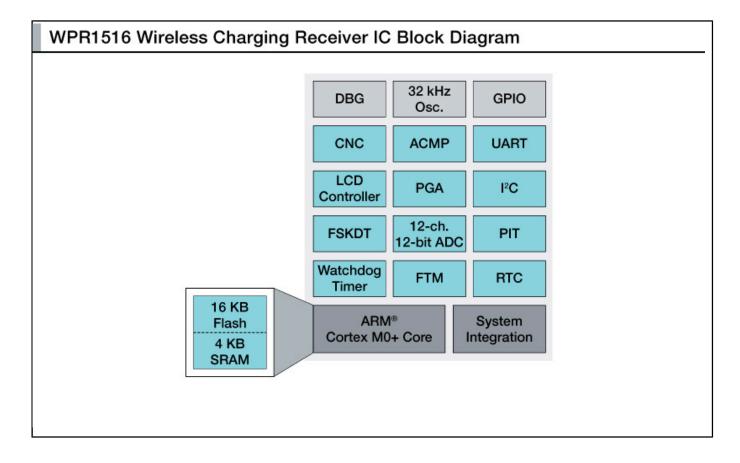

## **MWPR1516**

Last Updated: Sep 5, 2024

The MWPR1516 wireless charging IC and reference platform, based on the Arm<sup>®</sup> Cortex<sup>®</sup>-M0+ core, extends our wireless charging portfolio to support up to 15 watt charging power.

- Ideal for industrial and consumer applications, the MWPR1516 supports larger form factors that require faster charging times
- The high level of integration enables the MWPR1516 IC to drive smaller PCB form factor designs and offer the possibility for applications to do thermal design based on the application requirement
- This family adheres to the Wireless Power Consortium (WPC) and Medium Power Working Group (MPWG) specifications
