

Automotive-Qualified Embedded Secure Element (SE)

NCJ38A

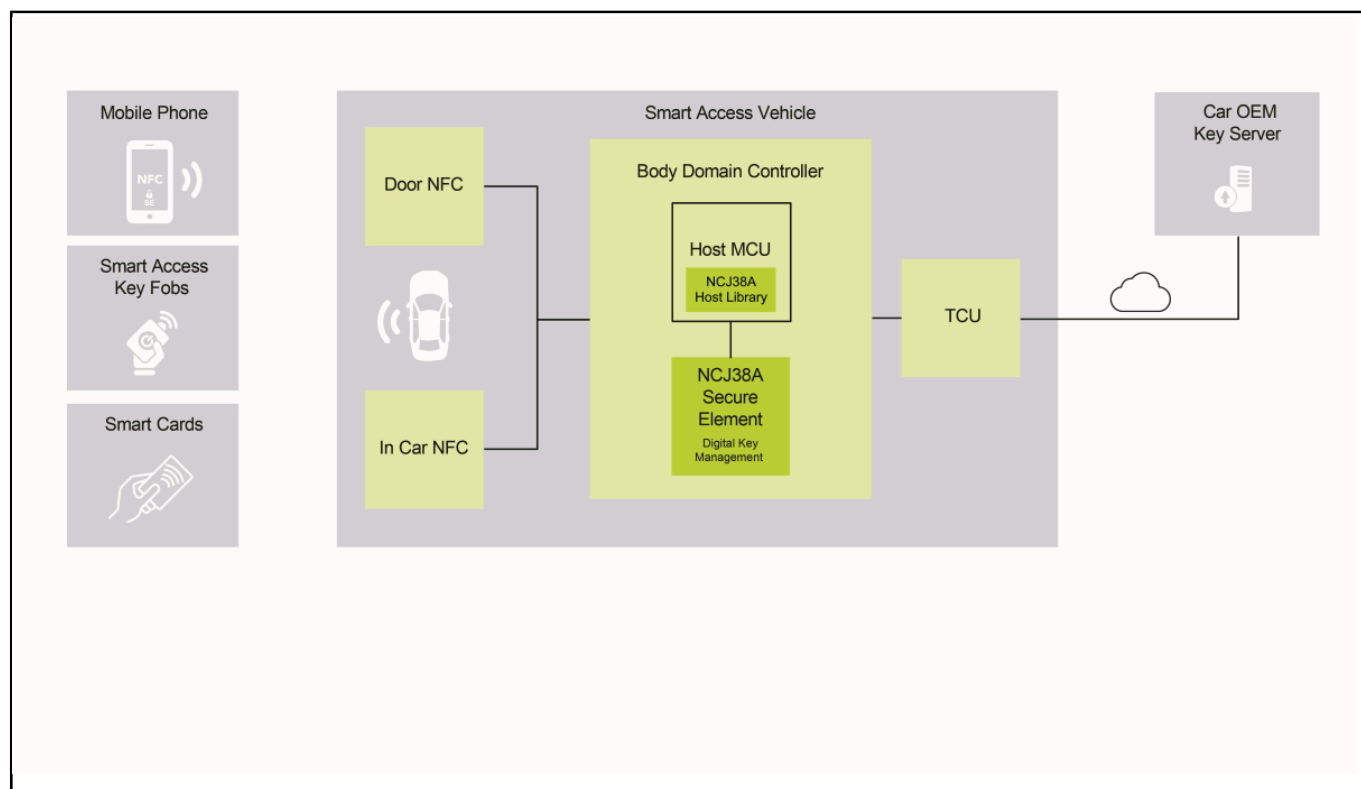

Last Updated: Oct 16, 2025

[Request an NCJ38A Secure Element](#)

The NCJ38A family is an Automotive-qualified secure microcontroller platform with advanced cryptographic accelerators and physical and electrical attack resistance. It supports a broad spectrum of M2M authentication means, cryptographic key and data storage, making it ideal for smart car access applications. The NCJ38A SE stores, authenticates and shares digital keys in a secure, privacy-preserving way.

The NCJ38A family complies with AEC-Q100 qualification requirements. And together with the [NCF3320](#) and [NCF3340](#) NFC chipsets, we offer a reference platform that follows Car Connectivity Consortium (CCC) Revision 2 standardization.
