This page contains information on a product that is no longer manufactured (discontinued). Specifications and information herein are available for historical reference only.

Last Updated: Oct 14, 2023

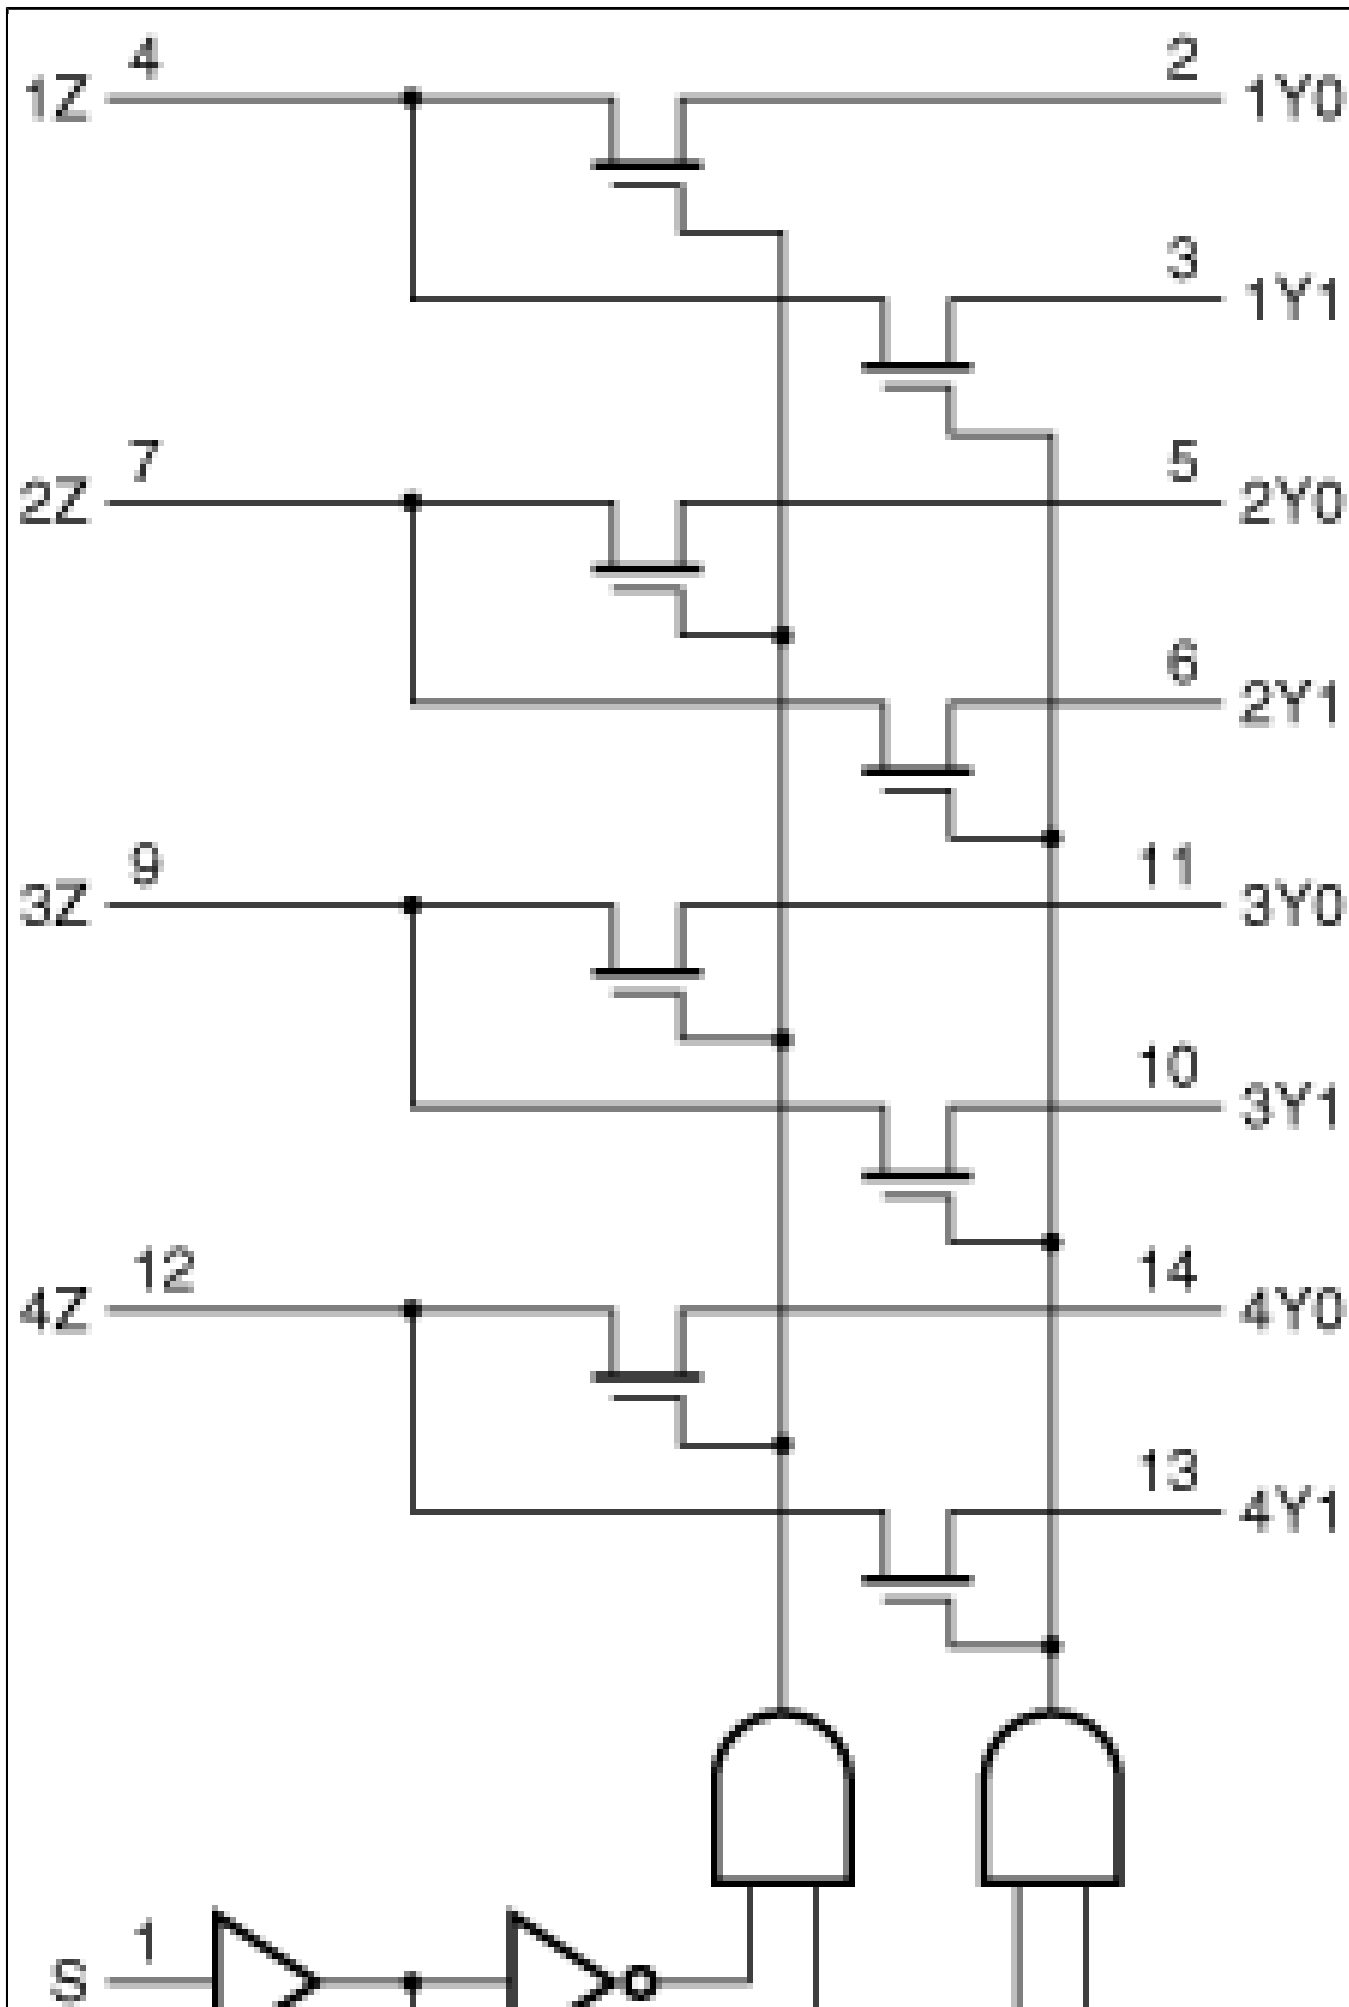

The NX5DV330 is a quad 1-of-2 high-speed TTL-compatible video multiplexer/demultiplexer. The low ON resistance of the switch allows inputs to be connected to outputs without adding propagation delay or generating additional ground bounce noise

It has a digital select input (S), four independent inputs/outputs (nY0, nY1), a common input/output (nZ) and an active LOW enable input (E). When pin E is HIGH, the switch is turned off.

Schmitt-trigger action at the enable input (E) and select input (S) makes the circuit tolerant to slower input rise and fall times across the entire VCC range from 4.0 V to 5.5 V.

The NX5DV330 is characterized for operation from -40 Cel to +85 Cel.
