

USB 3.2 and DisplayPort Linear Redriver

PTN37011 NEW

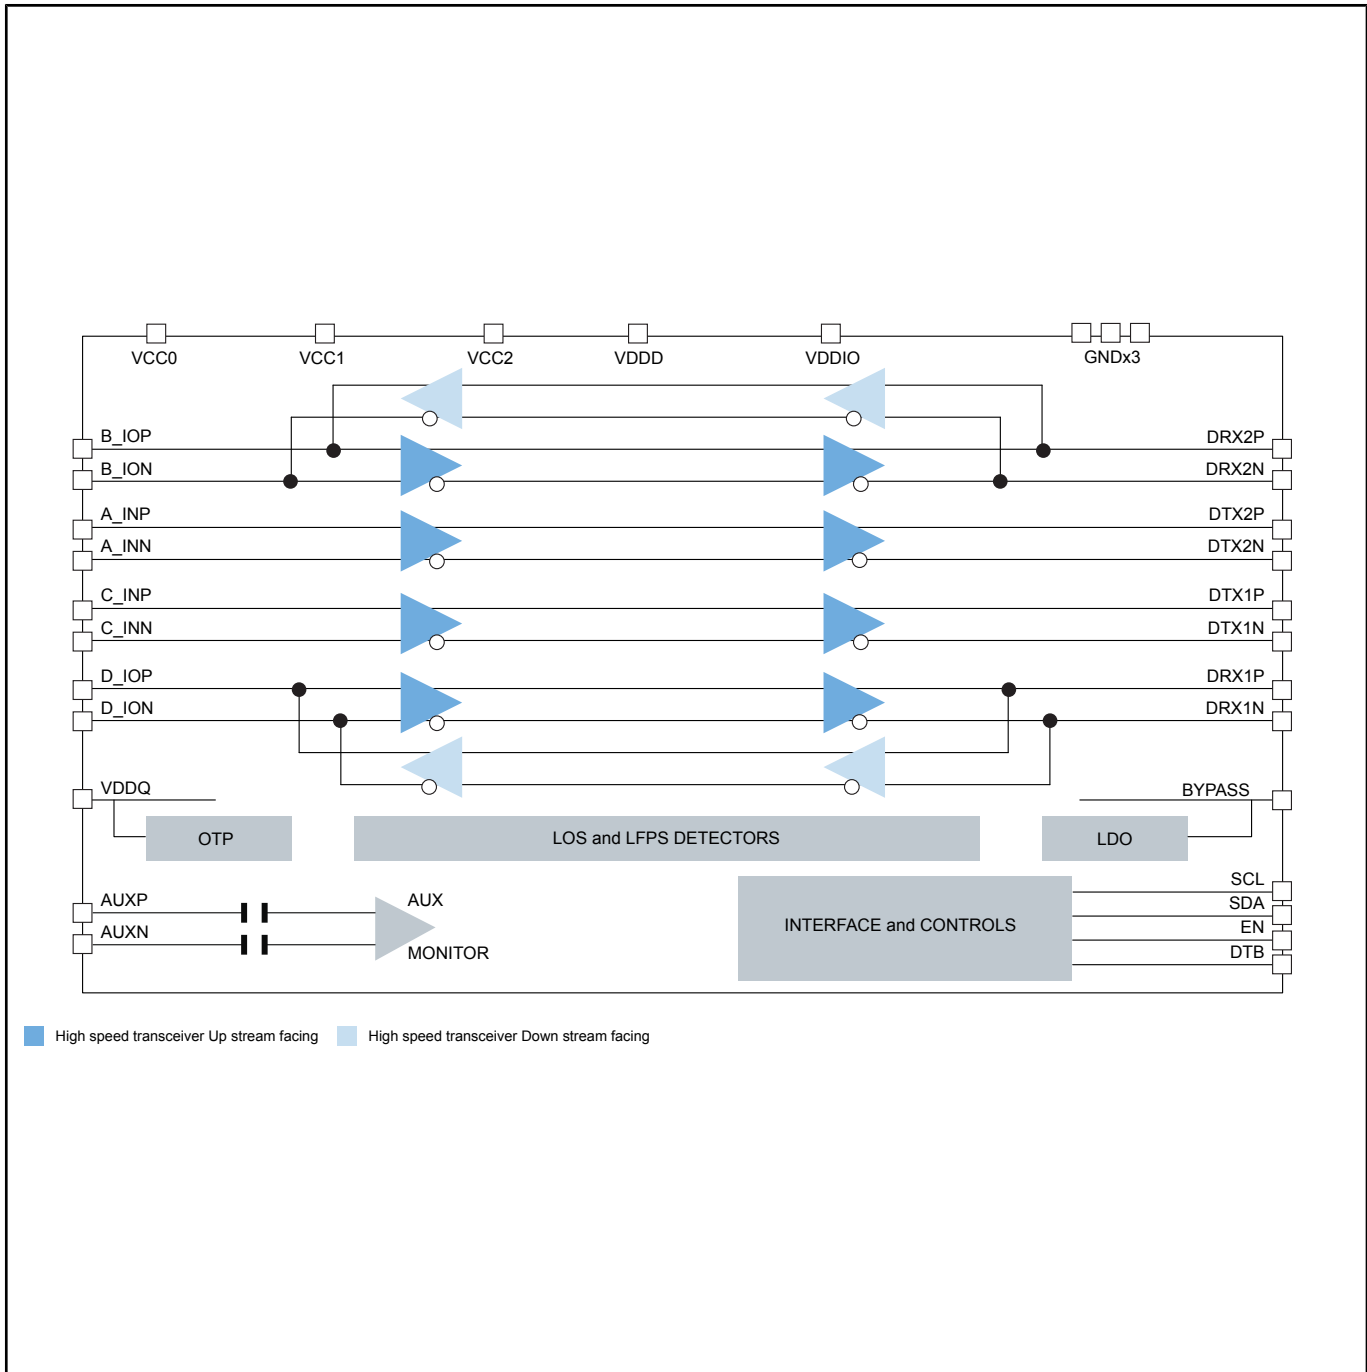

Preproduction

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information please contact your sales representative.

Last Updated: May 29, 2026

PTN37011 is a high performance USB 3.2 / DisplayPort (DP) 2.0 multiprotocol linear redriver that is optimized for USB 3.2 and DP 2.0 applications on either the downstream-facing port (DFP) or upstream-facing port (UFP) applications. It delivers high-speed signal quality enhancement requirements for USB Type-C interface in platforms that support the USB Type-C and VESA DP Alternate Mode standards.
