Available to selected customers only (non-disclosure agreement (NDA) required), please [contact support](#) or your local sales representative for more information.

The NXP ESS is a production-grade battery management system reference design. It is an IEC 61508 and IEC 60730 compliant architecture of up to 1500 V intended for a variety of high-voltage battery management solutions for utility, commercial, industrial and residential energy storage. NXP ESS is a complete hardware, software and safety package encompassing product safety libraries and documentation considering pre-certification for IEC 61508 SIL-2 and IEC 60730 Class B.
