

3 Phase Inverter Reference Design Using the GD3162 Gate Drive Devices with Mitsubishi® SiC Power Module

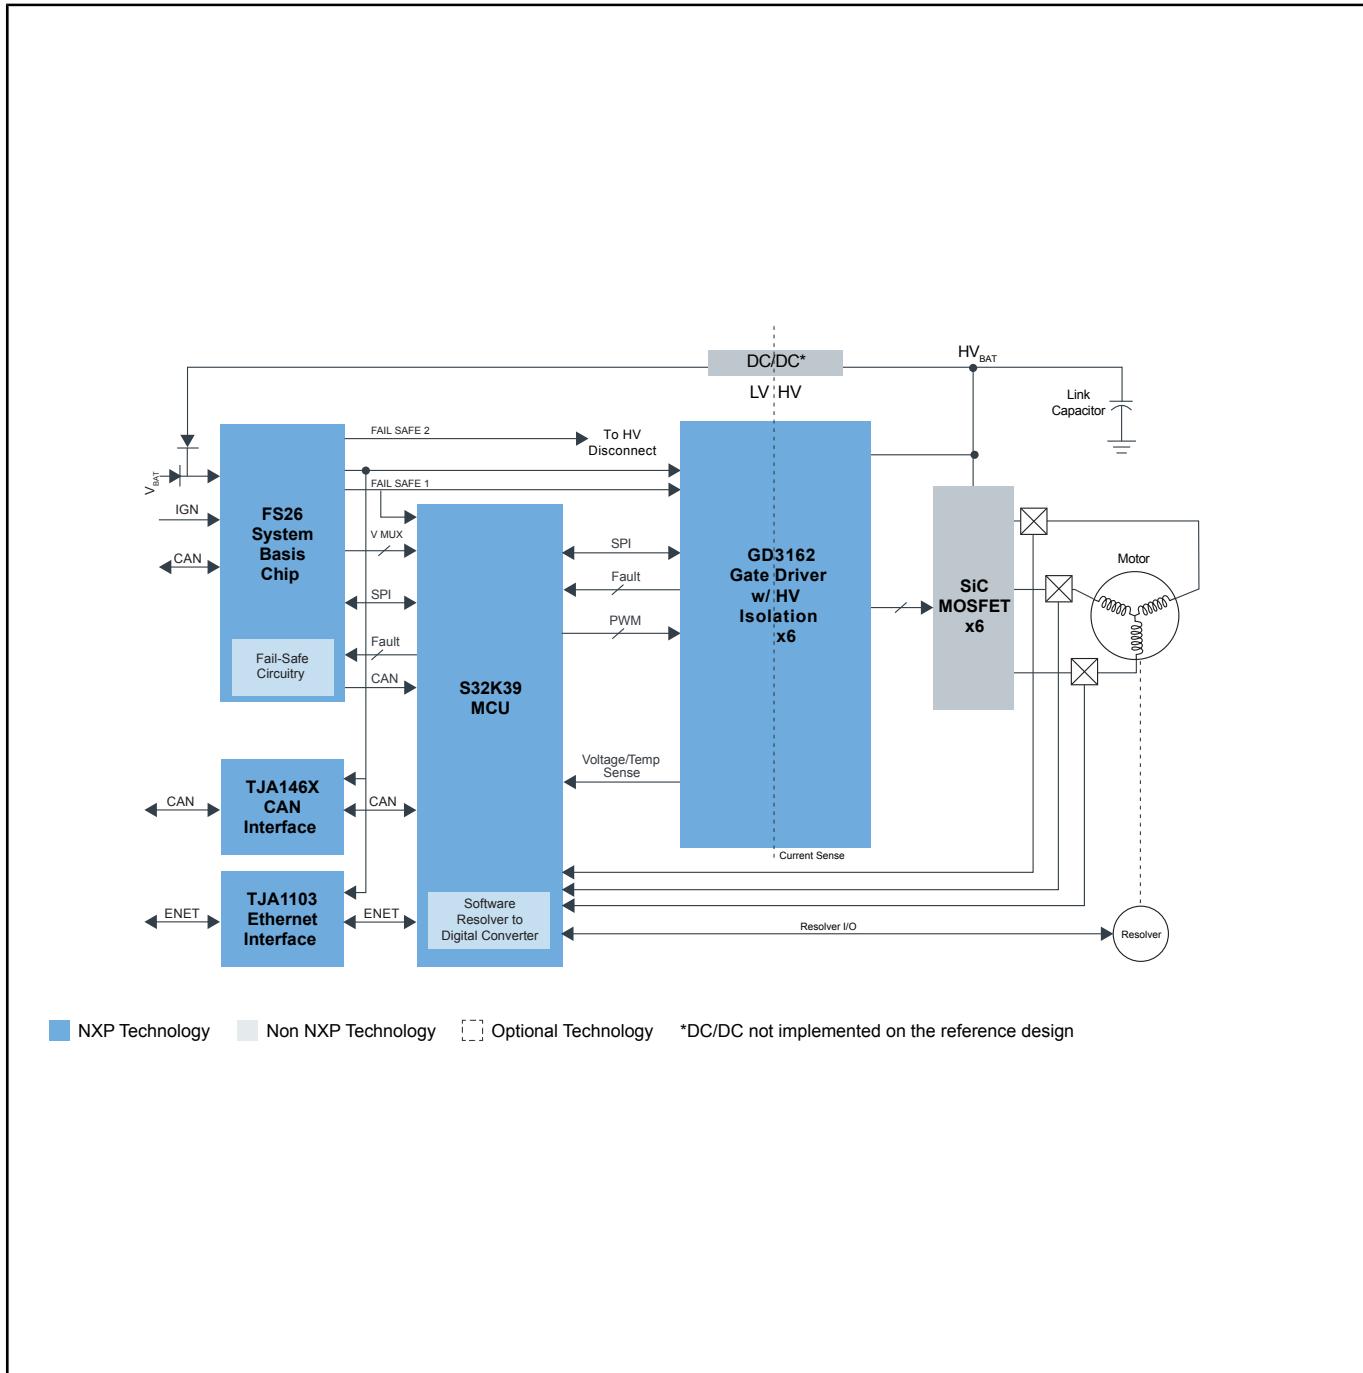

RDGD3162MITEVM

Last Updated: Dec 24, 2025

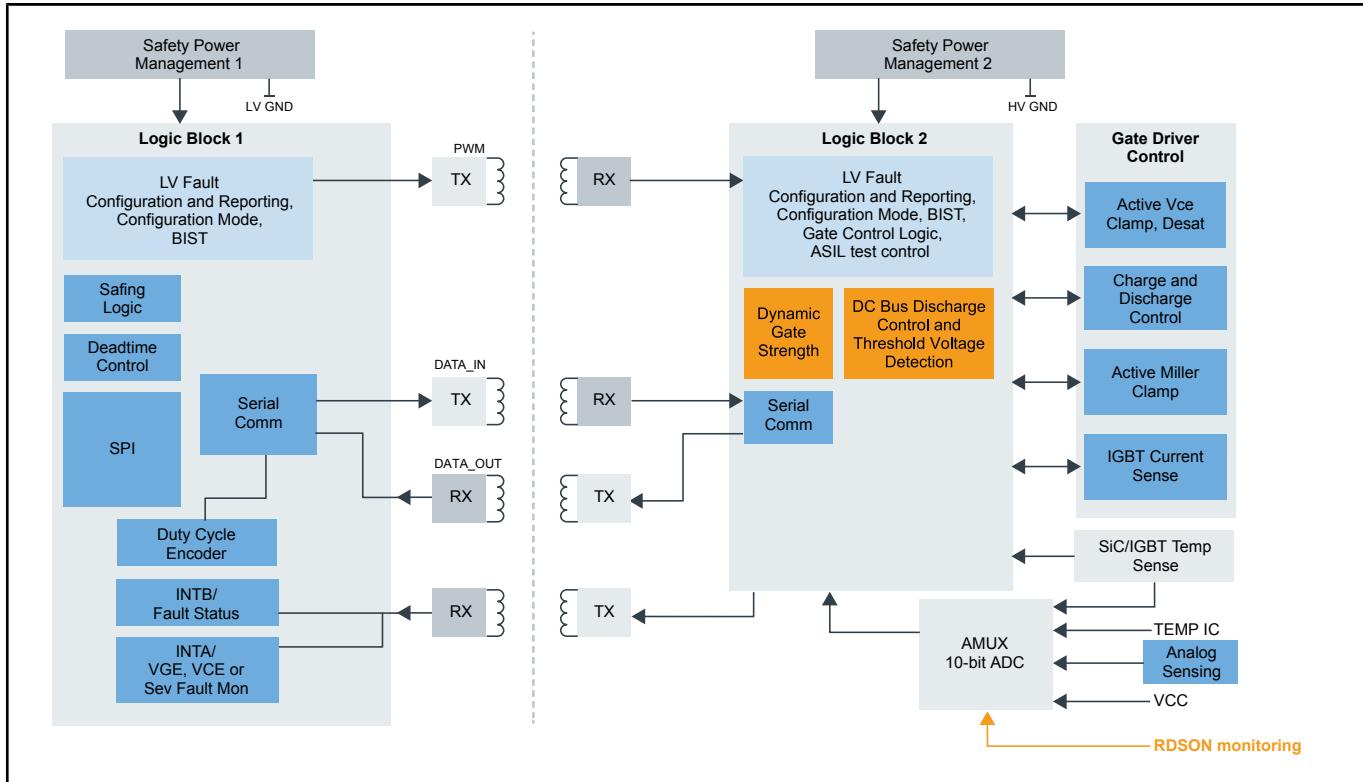

Available to selected customers only (nondisclosure agreement (NDA) required), please contact your local NXP sales representative for more information.

The RDGD3162MITEVM three-phase inverter is a functional hardware power inverter reference design, which can be used as a foundation to develop a complete ASIL D compliant high-voltage, high-power traction motor inverter for electric vehicles. This inverter is compatible with the Mitsubishi CTF700CJ3D130 SiC power module.
