# T1023 WLAN Access Point System

RDT1023WLAN

Last Updated: Dec 23, 2025

The T1023 WLAN Access Point system is based on the QorIQ® T1023 and is a semi-turnkey platform, primed for the rapid shipment to 802.11ac customers. This WLAN reference design board was co-developed with Alpha Networks and can be quickly productized to accelerate time to market with the latest 802.11ac features. The board comes with not only the 2.4 GHz and 5 GHz radio, but with an additional PCIe slot for a potential 60 GHz radio.
