

S32 Design Studio for S32 Platform

S32DS-S32PLATFORM

Last Updated: Apr 14, 2023

The S32 Design Studio for S32 Platform is a complimentary integrated development environment (IDE) for automotive and ultra-reliable Arm®-based microcontrollers and processors that enable editing, compiling and debugging of designs.

The S32DS for S32 Platform offers designers a straightforward development tool with no code-size limitations, based on open-source software including Eclipse IDE, GNU Compiler Collection (GCC) and GNU Debugger (GDB).

NXP software, along with the S32 Design Studio IDE, provides a comprehensive enablement environment that reduces development time.
