

S32G Vehicle Network Processing Evaluation Board 3

S32G-VNP-EVB3

Last Updated: Dec 23, 2025

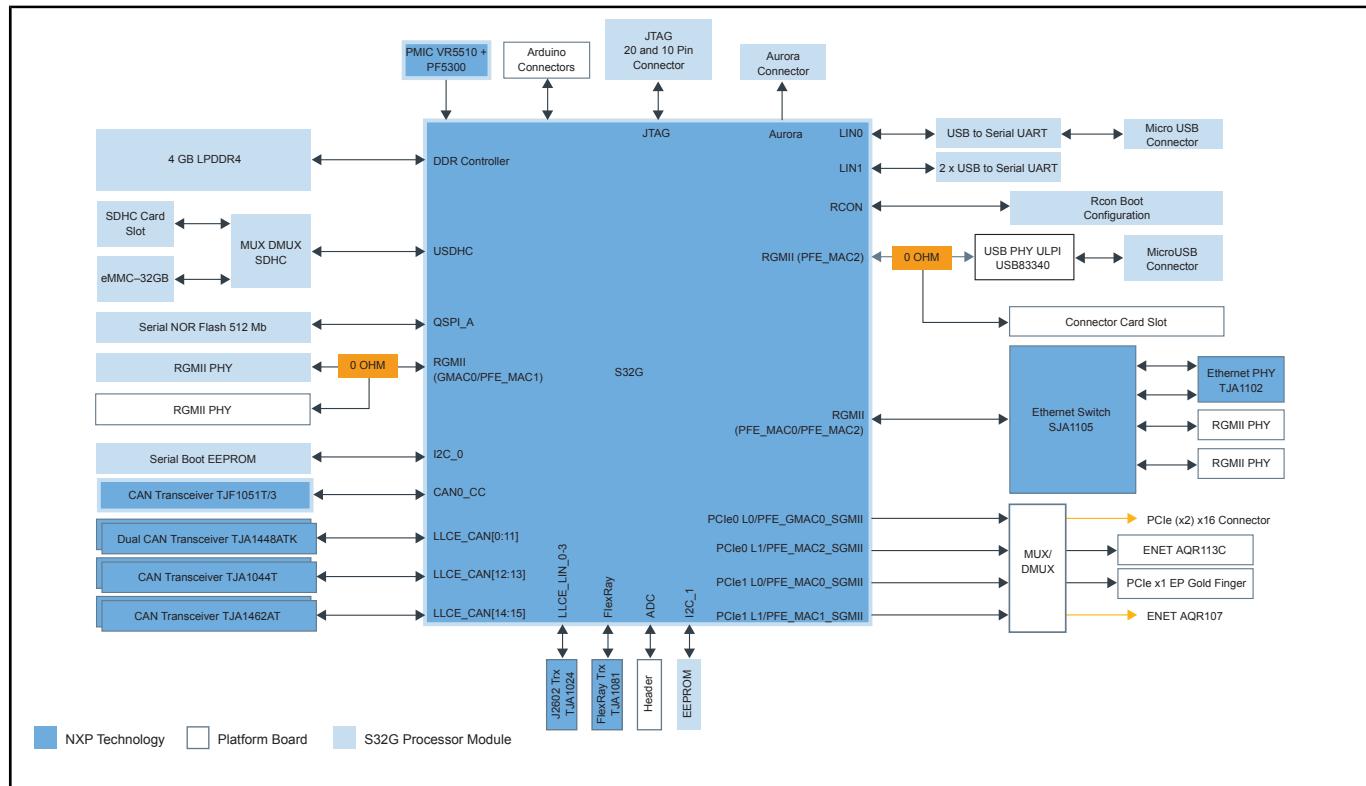

Please contact your regional sales representative or distributor for further information regarding the availability of this product.

The S32G-VNP-EVB3 is an evaluation and development board engineered for developing vehicle network processing applications, such as vehicle computers, service-oriented gateways and domain controllers.

Based on S32G2 and S32G3 processors for vehicle networking, the S32G-VNP-EVB3 offers a combination of automotive and enterprise networking technology with a wealth of interfaces (CAN/LIN/FlexRay/Ethernet) for vehicle networks, in addition to substantial safe compute performance.

The S32G-VNP-EVB3 includes peripheral devices with PCI Express and USB interfaces that can be leveraged by OEMs, Tier 1s and software ecosystem partners to shorten time to market.
