

S32G3 Processors for Vehicle Networking

S32G3

Preproduction

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information [contact support](#) or your sales representative.

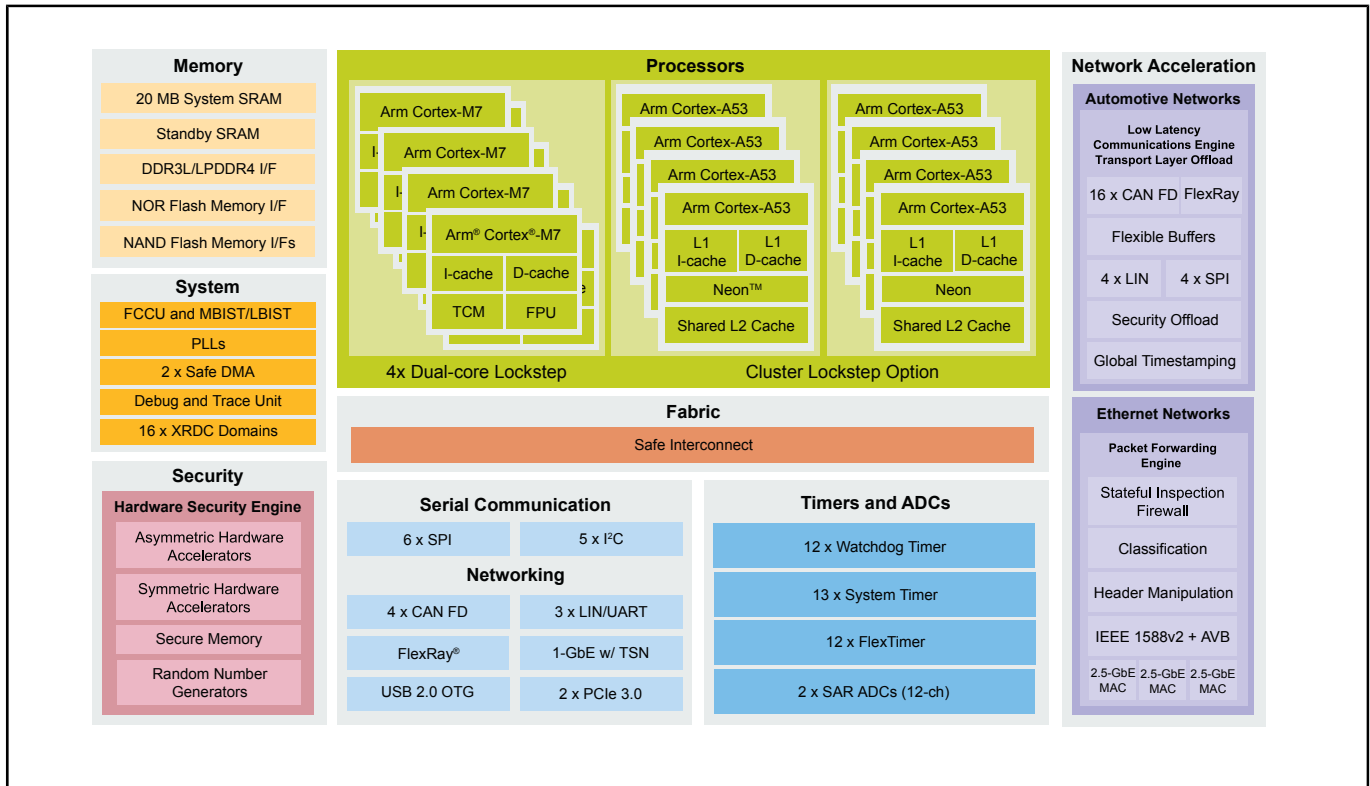

Last Updated: Jan 25, 2023

S32G3 vehicle network processors combine ASIL D safety, hardware security, high-performance real-time and application processing and network acceleration. S32G3 supports the needs of new vehicle architectures: service-oriented gateways, vehicle computers, domain controllers, zonal processors, safety processors and more.

The S32G3 vehicle network processors are supported by a broad range of software enablement that is comprised of Reference Software, Standard Software and Premium Software, in addition to support from the S32 Design Studio IDE.

S32G3 silicon and enablement (documentation, software and boards) are available for approved customers. Please contact your local NXP sales representative or [Contact Us](#) for more information.
