

# S32S Microcontrollers for Safe Vehicle Dynamics

## S32S24

### Preproduction

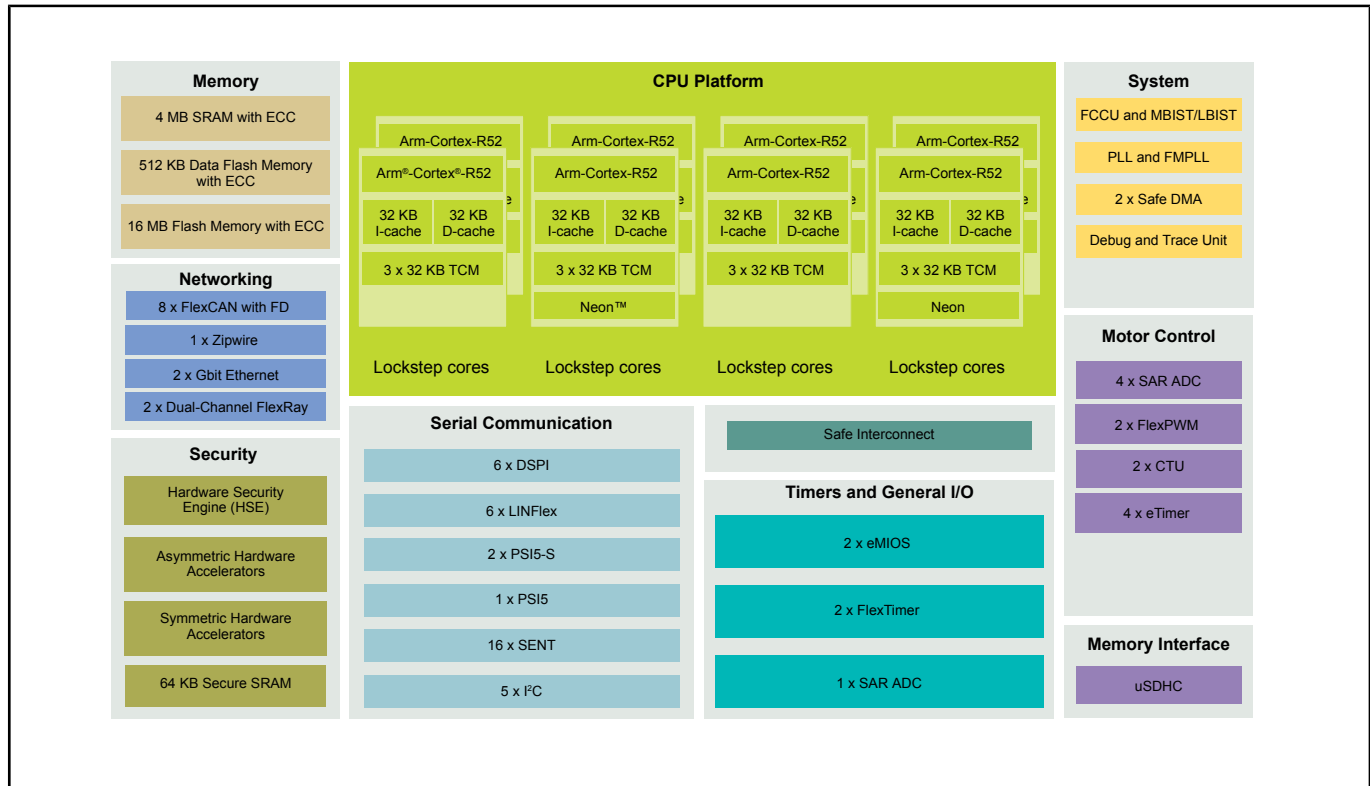

This page contains information on a preproduction product. Specifications and information herein are subject to change without notice. For additional information [contact support](#) or your sales representative.

Last Updated: Aug 2, 2022

The S32S24 is an Arm®-R52 based microcontroller for automotive vehicle dynamics, domain control and safety co-processor applications.

It offers support for the highest levels of automotive safety and with more than 7x the performance of previous generation devices, provides the performance headroom to manage the transition to advanced HEV/EV and autonomous vehicles applications.
