

SAF85xx Evaluation Kit with Antenna

SAF85XX-EVK

Last Updated: Feb 6, 2025

The SAF85xx evaluation kit is available for selected customers with an approved NDA. For additional information, [contact support](#) or your local sales representative.

The SAF85xx evaluation kit supports development of 77 GHz radar application and evaluation of SAF85xx one-chip radar SoC for automotive applications. This kit allows evaluation of various radar use cases by flexibly configuring the radar chirps and observing the processed output on a PC. Radar software development and evaluation of a comprehensive set of communication and debug interfaces are enabled by the kit. It consists of a front end antenna board with patch antenna supporting four transmitter and four receivers.

Back-end interface board supports power management and other interfaces to the PC. This evaluation kit can be used for comprehensive application development as well as RF evaluation.
