

SAF86xxL Evaluation Kit with Antenna

SAF86XXL-EVK

Last Updated: Feb 15, 2024

The SAF86xxL evaluation kit (EVK) supports the development of 77 GHz radar applications and the evaluation of SAF86xxL one-chip radar SoC for automotive applications. This kit allows evaluation of various radar use cases by flexibly configuring the radar chirps and observing the processed output on a PC. Radar software development and evaluation of a comprehensive set of communication and debug interfaces are enabled by the evaluation kit. The EVK consists of a front end antenna board with an optional slotted waveguide antenna supporting four transmitters and four receivers. This evaluation kit can be used for comprehensive application development as well as RF evaluation.

The SAF86xxL evaluation kit is available for selected customers with an approved NDA. For additional information, [contact support](#) or your local sales representative.
