

# Linux<sup>®</sup> Point of Sale (POS) Reader

## SLN-POS-LRDR

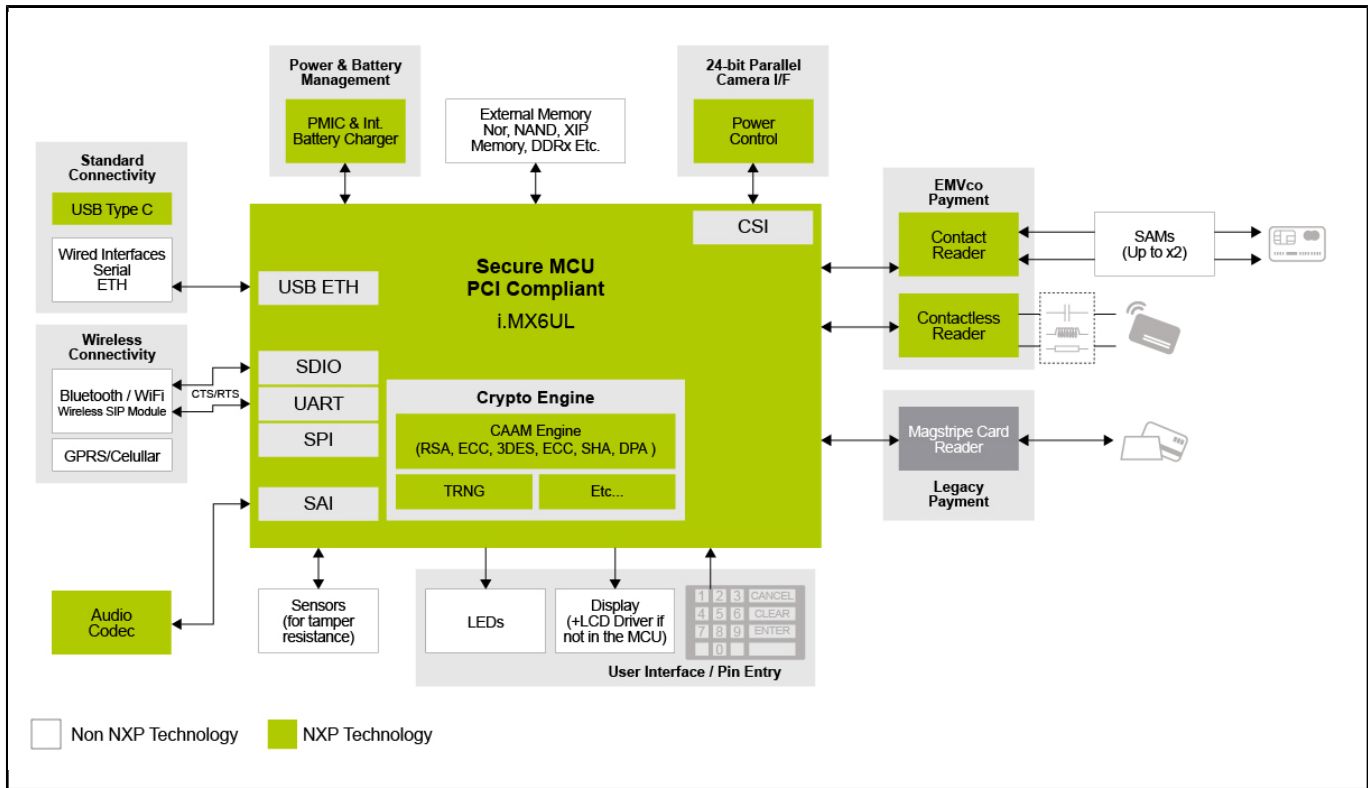

### Archived

This page contains information on a product that is no longer manufactured (discontinued). Specifications and information herein are available for historical reference only.

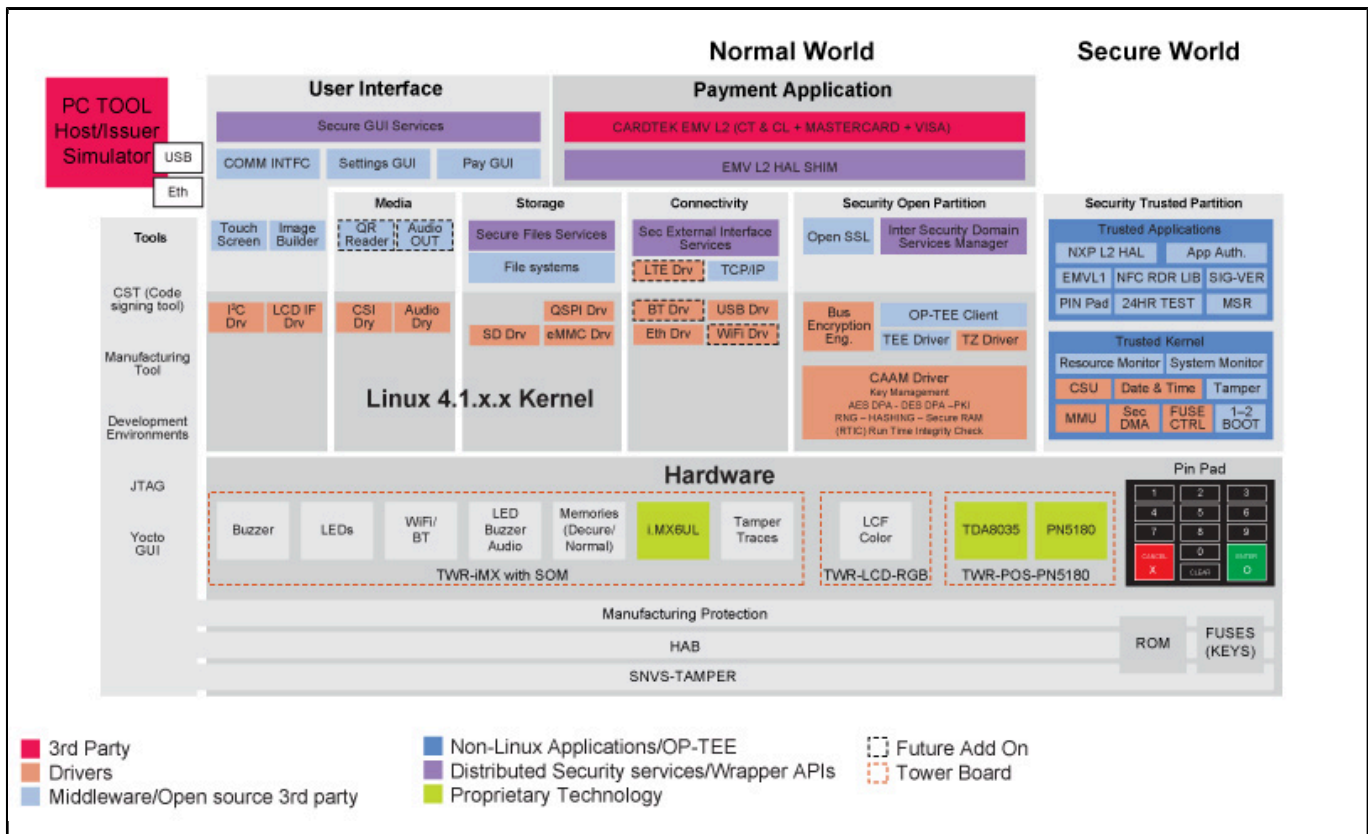

Last Updated: Jun 12, 2023

The SLN-POS-LRDR Linux Point of Sale Reader Solution enables you to quickly build a Linux-based POS terminal or add a PCI<sup>®</sup>- and EMVCo<sup>®</sup>-compliant PIN entry device, NFC reader, chip card reader and magnetic stripe reader to any design to enable credit card payment. This solution is precertified for EMVCo and PCI PTS standards to give companies confidence that they will have a high likelihood of passing certification the first time without the added expense of failing and resubmitting.
