

S32R41 and TEF82xx Development Platform Based on S32R41 EVB and TEF82xx CAB

TEF82-R41-KIT

Last Updated: Jun 12, 2025

The S32R41 and TEF82xx development platform is designed for enabling users to start radar development quickly and easily by providing an example software project based on the [S32R41 evaluation board \(EVB\)](#) and the [TEF82xx customer antenna board \(CAB\)](#). It integrates several NXP software components, including auto zephyr BSP, radar SDK (RSDK), real-time drivers (RTD), inter-platform communication framework (IPCF) and safety software framework (SAF).
