

UCODE X Boosts System Performance with Ultra-low Power Consumption and Standards-Based Features

UCODE-X

Last Updated: Jan 29, 2026

UCODE X, NXP's radio-frequency identification (RAIN RFID) tag chip, features ultra-low power (ULP) consumption, exceptional read/write sensitivity and rapid encoding speeds. Fully (Global Standards 1) Electronic Product Code (EPC) Gen2v2 compliant, it supports flexible memory configurations for diverse applications in retail, supply chain logistics, third-party shipment services and healthcare (including pharma). UCODE X enables tagging of smaller, items—such as food or cosmetics—while promoting sustainable inlay design.
