

Multimedia Applications Processors - Power Management Unit, Arm9™ Core

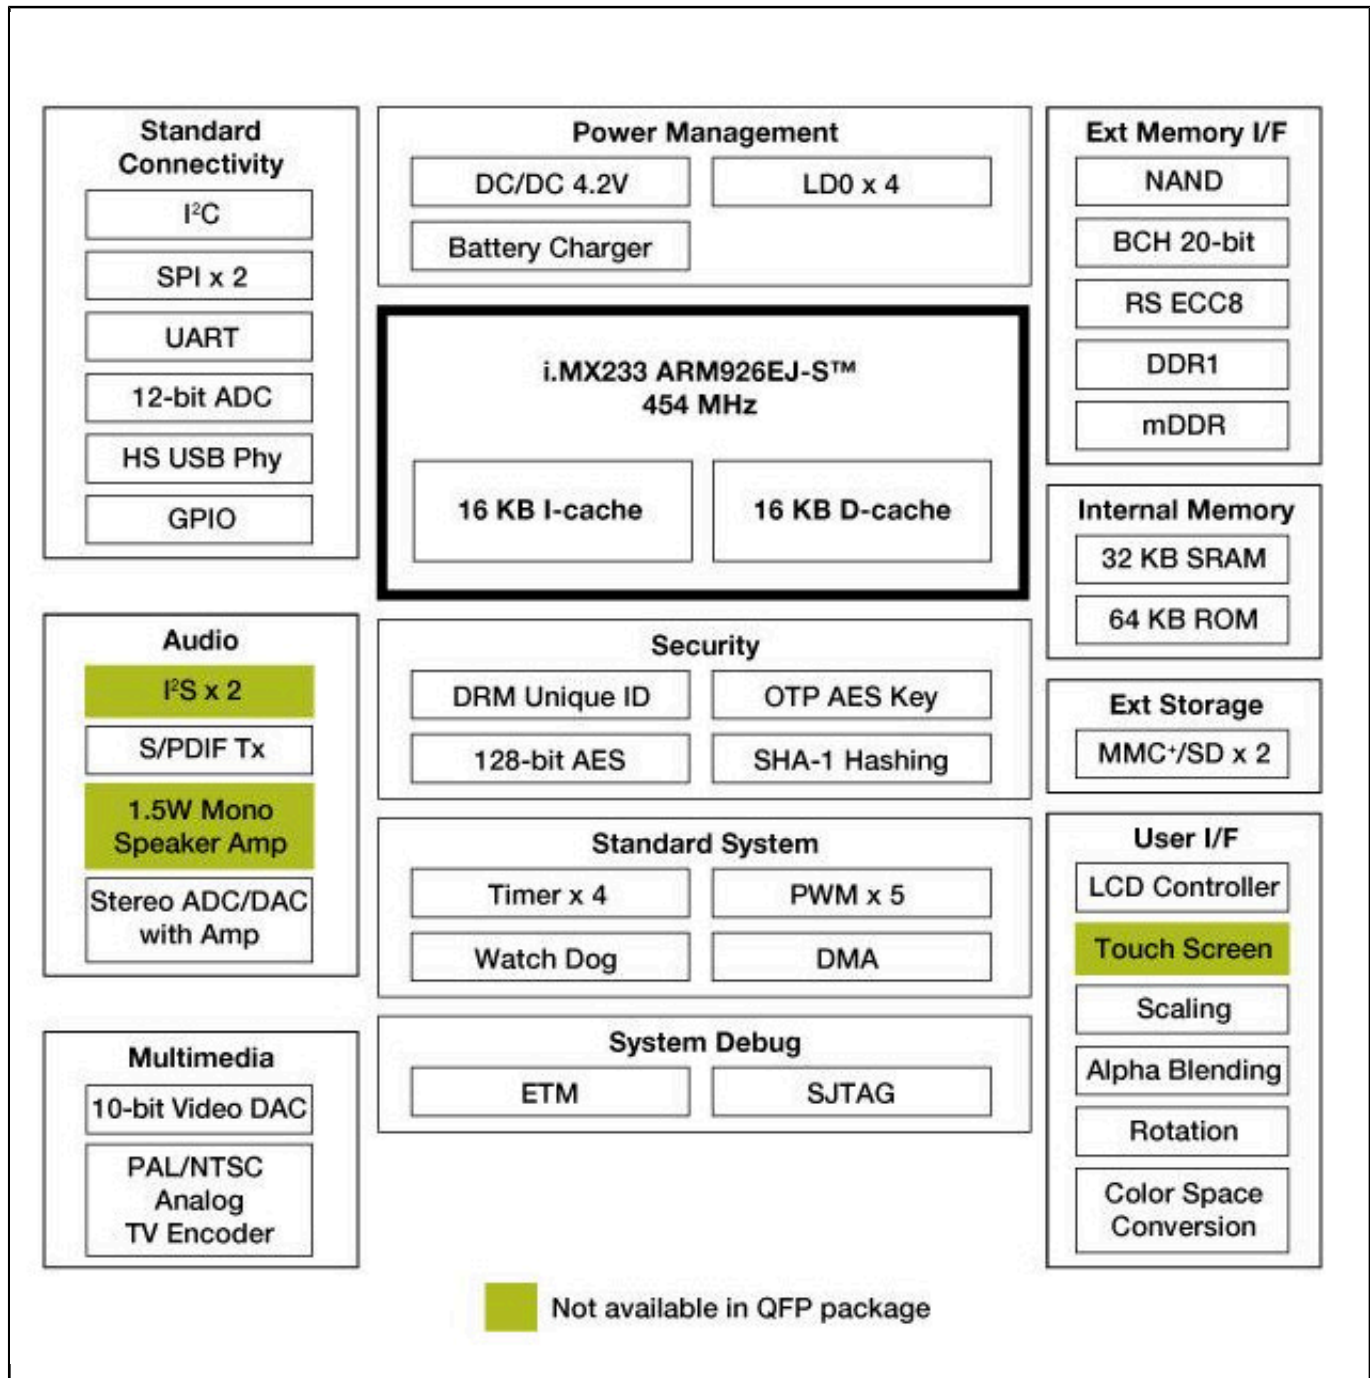

i.MX233

Last Updated: Apr 8, 2022

The i.MX233 applications processor provides ample headroom for consumer and embedded applications without sacrificing battery life.

- Allows customers to eliminate external components, reducing overall system bill of materials cost
- Integrates advanced power management technology to manage the power sequencing required by the processor itself
- Offers low power consumption that can improve energy efficiency
- Backed by strong enablement for designing differentiated products in less time
