

# Multimedia Applications Processors

## - High-Performance, Low-Power, Arm9™ Core

### i.MX283

Last Updated: Jan 7, 2026

The i.MX283 applications processor offers a low-power, high-performance solution that comes optimized for the general embedded industrial and consumer markets.

- Enables applications such as media and smart energy gateways, handheld printers and scanners, and portable medical devices
- Reduces system cost and complexity and provides greater flexibility in system design
- Provides extended temperature coverage for harsh environments
- Industrial qualification and product longevity supports the full life of the product in the field
- Supported by a comprehensive suite of software and tools
